Descriptions for all of our New Perennial varieties can be found on pages 6-9. These varieties can be ordered on our 2019 Order Form. Our new selections sell out quick, so early ordering is best!
Acanthus 'Morning Candle'
Zones 6-9 ~ Full Sun/Part Sun
Lush, compact mounds of rich green, deeply toothed foliage produce 4-5' tall spikes of hooded white flowers with mauve purple bracts, mid-late summer. Said to be a hybrid of A. mollis and A. spinosus, but may very well be a hybrid of A. mollis and A. hungaricus. Exhibits good heat tolerance.

Acanthus mollis 'Whitewater' PP23342
Zones 7-10 ~ Part Shade/Full Shade
This selection truly makes a statement with its stunning variegated, sharply toothed foliage and pink and cream flower spikes that are equally stunning in summer. Grows 3-4' and 4' wide. Bred for increased vigor, hardiness and tolerance to heat and humidity. Longer leaves and more vigorous than 'Tasmanian Angel'. An outstanding accent shade plant.

Cimicifuga (Actaea) simplex 'Black Negligee'
Zones 4-9 ~ Part Shade/Full Shade
Deeply cut, lacy foliage starts out emerald green, maturing to a brilliant dark purple. Long, narrow, creamy white flower spikes with a pink tinge, bloom Aug.-Sept. 1-2' above the attractive foliage. Grows 4-5' tall and 2-3' wide at maturity.

Cimicifuga (Actaea) 'Chocoholic' PP24821
Zones 4-8 ~ Part Shade/Full Shade
A seedling of C. 'Brunette' discovered by Marco van Noort in the Netherlands. Dark bronzy "near black", upright foliage is a showy addition to the shade garden. Arching spikes of fragrant, mauve-pink bottlebrush flowers bloom in late summer, adding to the show! Grows 3-4' tall and wide at maturity. Deer and rabbit resistant.

Amsonia tabernaemontana 'Storm Cloud'
Zones 4-9 ~ Full Sun/Part Sun
Near black stems with dark green, silver-veined foliage emerge in spring, giving way to sprays of periwinkle blue star flowers, late spring into early summer. Shrub-like habit, growing 24-30" tall and 38-42" wide. Low maintenance.

Anemone 'Elfin Swan' PPAF
Zones 4-8 ~ Full Sun/Part Sun ~ Native
This compact variety boasts masses of white flowers blooming from violet blue buds in fall. Attractive, dark green foliage. Vigorous, medium height variety. Grows 14-20" tall and to 28" wide.

Aruncus 'Chantilly Lace' PPAF
Zones 3-7 ~ Part Shade/Full Shade ~ Deer Resistant
Beautiful, airy sprays of cream flowers bloom in mass, late spring to early summer, from shrub-like plants with fine cut, deep green foliage. The perfect addition to any shade garden and a nice substitute for the less drought tolerant Astilbe! Grows 30-32" tall with a spread of 40-48" wide.

Astrantia major 'Burgundy Manor'
Zones 5-9 ~ Full Sun/Part Sun
A stunner with very large, ruby red pincusion flowers that have pink to green bracts bloom mid-summer from clumps of glossy, toothed green foliage. Cut back from repeat bloom. 24-28" tall and 16-20" wide. Excellent cut flower and container plant. Taller than most A. major types growing to 36" tall.

Brunnera macrophylla 'Alexander's Great' PP25789
Zones 3-8 ~ Part Shade/Full Shade
Named for Alexander Zukeivich of Belarus, who discovered the seedling in his garden. Similar to B. 'Jack Frost' but larger. Forms very large mounds of heart-shaped leaves with silver overlay and contrasting green venation and edging. Small sky blue flowers bloom April-May from the attractive foliage mounds. Grows 12-18" tall and 24-30" wide. A great accent plant for shady borders, gardens and containers.

Dicentra spectabilis 'White Gold' PP27638
Zones: 4-8 ~ Part Shade/Full Shade
An exquisite cultivar sure to brighten up any shady spot, with it's brilliant, golden, fine-cut foliage and white heart shaped flowers blooming in spring. Grows 24-30" tall by 36" wide.

Echinacea purpurea 'Showoff'
Zones 3-10 ~ Full Sun

Echinacea Sombrero® Adobe Orange PP26639
Zones 4-9 ~ Full Sun
An impressive orange addition to the series. Long blooming, late spring through summer, with a masses of eye-catching, bright orange ray flowers with coordinating orange cones. Blooms 18-20" tall and 22-24" wide. A proven performer for containers and landscape use.

Echinacea Sombrero® Granada Gold PP26639
Zones 4-9 ~ Full Sun
Radiant gold flowers with gold cones bloom in profusion late spring to late summer. Grows 18-20" tall and 22-24" wide.

Epimedium 'Pink Champagne'
Zones 5-8 ~ Part Shade/Full Shade
An exquisite variety from breeder Darrell Probst. Elegant flowers with white spurs and raspberry centers bloom abundantly, mid-late spring from plants with elongated, deep green foliage mottled with dark burgundy. 18-24" tall and 24" wide. Evergreen.
Euphorbia characias 'Galaxy Glow' PP28761
Zones: 6-9 ~ Full Sun
An eye-catching new Euphorbia selection that has proven to be one of the longest-living of its species! Well-branched, glaucous-green foliage has pink new growth, forms shrub-like mound 24-36” tall by 24-36” wide. Green flowers bloom winter to spring, turning to pink over time and re-blooming in summer. Works well in borders, containers and as a specimen plant. Semi-evergreen. Drought tolerant.

Helleborus x hybridus Winter Jewels® 'Amber Gem'
Zones 4-9 ~ Part Shade/Full Shade
A double-flowering hybrid with large, nodding flowers in shades of pale apricot to light amber, with pink flushed petal edges. The gorgeous flowers emerge from thick, upright stems of attractive, glossy, leathery, evergreen foliage, late winter to early spring. The shrub-like plants grows 12-14” tall and up to 24” wide. Exceptional disease and pest resistance.

Helleborus x hybridus Winter Jewels® 'Black Diamond'
Zones 4-9 ~ Part Shade/Full Shade
Single flowers, in shades of deep slate blue to purple to near black, cover attractive, vigorous foliage clumps late winter to spring. Thick, leathery, evergreen foliage. Great for adding contrast and texture to woodland gardens, borders and cutting gardens. Grows 15-18” tall and 18 -22” wide.

Helleborus x hybridus Winter Jewels® 'Blue Diamond'
Zones 4-9 ~ Part Shade/Full Shade
Stunning, dark purple-blue, single flowers bloom early to late winter on shrub-like mounds of deep green, leathery foliage. Grows 9-12” tall and 12 -14” wide, working best in shady borders or containers.

Helleborus 'Golden Lotus'
Zones 4-9 ~ Part Shade/Full Shade
Large (2-3”), double blooms in a pastel lemon yellow, some with burgundy margins, emerge from bushy clumps of sturdy, upright stems with bright green foliage. Heavy blooming late winter to early spring, just time to brighten things up! Grows 12-24” tall and to 24” wide and works well in shady borders, woodland gardens, in containers and as a shady groundcover. Evergreen.

Helleborus 'Fire and Ice'
Zones 4-9 ~ Part Shade/Full Shade
Exquisite double white blossoms are edged with dark pink, creating a wonderful contrast in the late winter landscape. Flowers bloom late winter to early spring from mounds of sturdy, upright dark green foliage. Grows 12-22” tall and to 24” wide. Evergreen.

Helleborus 'Onyx Odyssey'
Zones 4-9 ~ Part Shade/Full Shade
Gorgeous, double blossoms in shades of dusky purple, slate, or black, some with darker picotee edging, appear late winter to early spring from mounds of sturdy, upright dark green foliage. Grows 18-22” tall and to 24” wide. Evergreen.

Heuchera 'Carnival Rose Granita'
Zones 4-9 ~ Full Sun/Part Sun
Tidy mounds of eye-catching, rich purple foliage with silver overlay and dark purple venation showing through. Dainty white flowers bloom in spring. Grows 10-12” tall and 12-14” wide and exhibits excellent heat and humidity tolerance.

Heuchera 'Southern Comfort' PP20364
Zones 4-9 ~ Full Sun/Part Sun
Huge, rounded leaves (to 9”) start out in shades of peach and burnt sienna, transitioning to amber throughout the season, forming a broad, 14” x 24” mound. Creamy white flowers mid-late summer on 22” scapes. It’s like brightening up the landscape with a big dose of southern hospitality!

Hosta 'Bulletproof'
Zones 4-9 ~ Full Sun/Part Sun
It’s all in the name! The blue-green leaves of this Hosta are extremely thick, making them very resistant to slug and snail damage. In addition, they hold their color all season when grown in full shade. Lavender flower scapes in mid-summer. The medium sized mounds grow 16-20” tall by 36” wide at maturity. Said to be a tetraploid sport of 'Halcyon'.

Iris germanica 'Fringe of Gold'
Zones: 3-9 ~ Full Sun
36-40” tall, mid-late spring bloomer with bright canary yellow standards, white beards and white falls fringed in canary yellow. Will brighten up gardens, borders and vases alike!

Iris germanica 'Hemstitched'
Zones: 3-9 ~ Full Sun
32” tall, late spring bloomer, with sweetly fragrant, ruffled white blooms, stitched on the edges with lilac. Just like it’s parent, ‘Earl of Essex’, it is a re-bloomer with late summer or early fall blooms.

Iris germanica 'Mary Frances'
Zones: 3-9 ~ Full Sun
36-40” tall, late spring-early summer bloomer, with fragrant, lavender flowers brushed with a hint of white on the falls and golden beard. Very floriferous, usually with 6-10 buds per stem! ‘Mary Frances’ has many awards under it’s belt, including the prestigious American Iris Society Dykes Medal (1979).
Iris germanica 'Violet Turner'
Zones: 3-9  ~  Full Sun
30” tall, early to mid-season bloomer, boasting lavender-violet standards and dark purple falls edged in pale lavender. Tangerine beard. Sweet fragrance. If that weren’t enough, it reblooms in late summer!

Iris sibirica 'I See Stars!'
Zones: 3-9  ~  Full Sun/Part Sun
30” tall, late spring-early summer bloomer, with dark blue petals that feature broad white signals creating a star-like appearance. A standout in the garden and in bouquets!

Iris sibirica 'Peacock Butterfly™ Uncorked'
Zones: 3-9  ~  Full Sun
24-28” tall, spring bloomer, with unique flowers featuring periwinkle standards and golden yellow falls edged with a broad band of dusky purple. Truly uncorked!

Kniphofia 'Lucky Lemons' PPAF
Zones: 5b-9  ~  Full Sun  ~  Deer Resistant
Any garden would be lucky to welcome the two-toned lemon yellow flower spikes of this exciting variety from the Winners Club™ series! Long-blooming, mid-late summer. Grows 42-48” tall and 30-36” wide. A magnet for hummingbirds and passers-by alike!

Kniphofia 'Solar Flare' PPAF
Zones: 5b-9  ~  Full Sun  ~  Deer Resistant
Bright sunny yellow, upright flower spikes hold their color all season, looking radiant from early to late summer! Grows to 36-42” tall and to 30” wide, with grass-like foliage that creates a nice contrast with large-leaved perennials.

Liatris pycnostachya
Zones: 3-9  ~  Full Sun
Touted as the tallest Liatris species in cultivation, the gorgeous lilac-purple flower spikes typically grow from 2-4’ tall and even to 5’ tall on rare occasions. It has an upright, clumping habit, and blooms July-Aug. Exhibits good tolerance to drought, heat, humidity and poor soil. Likes moist, well-drained soil but no wet feet in the winter. Sometimes categorized as biennial. Excellent cut flower.

Lobelia cardinalis 'Black Truffle' PP25687
Zones: 3-8  ~  Full Sun/Part Sun
This nativar forms upright, bushy mounds of the deepest purple-black foliage, making it a stunning addition to the border and providing interest and contrast all season. It’s also perfect for rain gardens and hummingbird gardens. With warm, late season weather, the foliage transitions to a lustrous maroon tone. The cardinal red flowers blooming mid-summer to fall look nothing short of radiant against the dark foliage backdrop! It’s worth noting that this is a true selection of the native species, not a hybrid, like many other dark-leaved cultivars.

Lupinus 'Westcountry™ Red Rum' PP18709
Zones 4-8  ~  Full Sun/Part Sun
Large, dense spikes ranging from crimson to lilac bloom late spring to mid-summer from plants with attractive palmate foliage. Grows to 36” tall in bloom and 12-15” wide. Also drought resistant and tolerates some shade. Named for Westcountry Nurseries in England, by whom was introduced.

Paeonia 'Alertie'
Zones: 3-8  ~  Full Sun/Part Sun
Beautiful, ruffled, double flowers with pastel pink, peach and cream hues bloom early to mid-spring on plants growing 32-34” tall. Sweet fragrance. This variety is becoming more and more popular for flower arrangements.

Paeonia 'Henry Bockstoce'
Zones: 3-8  ~  Full Sun/Part Sun
Huge (8”), deep cardinal red, double flowers bloom heavily, late spring-early summer, on sturdy, long stems with glossy, dark green foliage. Grows 32-40” tall and 24-36” wide. Foliage looks great right up until frost. The result of a cross between P. lactiflora and P. officinalis, this is said to be one of the best red double peonies and more vigorous than many of it’s counterparts. If that weren’t enough, it also has a very sweet fragrance and makes a wonderful cut flower!

Paeonia lactiflora 'Jacorma'
Zones: 3-8  ~  Full Sun/Part Sun
A mildly fragrant, mid to late season bloomer that is well worth the wait, with gorgeous, pure pink, fully double flowers blooming from sturdy stems with attractive, dark green foliage. Said to be one of the best true pink peonies. Grows to 34” tall and 24-30” wide. The name was derived using letters at the beginning of 3 dutch names (Ja, Cor, Ma). Good disease resistance. Perfect for the border and as a cut flower.

Paeonia lactiflora 'Pecher'
Zones: 3-8  ~  Full Sun/Part Sun
A compact, but floriferous Peony with masses of wonderfully fragrant, pale pink to white semi-double flowers blooming mid-season. Occasionally, shows a red threading at the base. Grows to 28-32” tall and to 24” wide. Long lasting cut flower.

Paeonia lactiflora 'Purple Spider'
Zones: 3-8  ~  Full Sun/Part Sun
We’re guessing it gets it’s name from the long frilled petals at the center of the large, fragrant, fuchsia-purple blossoms. Whatever the case, this is one spider people will actually like! For added effect, the tips of the petals often fade to white, giving the flower a frosted appearance. Mid-late season bloomer, growing 36” tall and 30” wide.
Peony Itoh Hybrids:
Itoh hybrids are known for their large flower size (to 6”), late bloom season and lush, fine cut, mounded foliage. A mixture of herbaceous and tree peonies, featuring the best qualities of both parents, providing the perennial growing cycle of herbaceous types with the exotic, colorful bloom types Tree Peonies offer. Named for Toichi Itoh, the first hybridizer to have success with a Tree Peony and Herbaceous Peony cross in the 1940’s.

Paeonia (Itoh) ‘All That Jazz’
Zones 3-8  ~  Full Sun/Part Sun
Gorgeous, fully double, pale apricot flowers, with magenta-burgundy speckling and spotting, bloom late spring to early summer. Grows 24-36” tall and to 30” wide. Wonderfully fragrant and very floriferous, with up to 50 blooms possible at any given time!

Paeonia (Itoh) ‘Cora Louise’
Zones: 4-8  ~  Full Sun/Part Sun
Large, semi-double blossoms in white with stunning dark lavender center spotting bloom in abundance in late spring.

Paeonia (Itoh) ‘Morning Lilac’
Zones: 4-8  ~  Full Sun/Part Sun
Large, fragrant, lilac-magenta, single to semi-double flowers bloom May-June and are highlighted with white and purple. Golden stamens complementary the already gorgeous blooms!

Paeonia (Itoh) ‘Scrumdiddlyumptious’
Zones: 4-8  ~  Full Sun/Part Sun
As the name implies, they look yummy enough to eat! The semi-double to double flowers that bloom mid-late season have soft cream petals that are ever-so-lightly brushed with pink, darkening a bit at the edges. Grows to 30” tall.

Perovskia ‘Blue Jean Baby’ PP29281
Zones 4-9  ~  Full Sun
One of the earliest blooming Perovskia, with spikes of lavender blue flowers blooming in mid-summer, with the smoky purple calyxes carrying the color into fall. Compact plants, with silver-green foliage grow 28-34” tall and to 36” wide. Good density and vigor in the landscape. Perfect in mass plantings or as an accent plant.

Stachys x ‘Summer Crush’
Zones 4-9  ~  Full Sun/Part Sun
An apropos name for this beauty! Fragrant, pink and white bi-color flower spikes bloom June into July from dense, compact mounds of attractive, crepe-like green foliage. Use in borders, cottage gardens and for naturalizing. Grows 24-30” tall and 12-24” wide.
