**Abutilon**

**Abutilon ‘Dwarf Red’**
- Zones 9–11
- **° £**
- This compact and floriferous 2’ plant bears gorgeous, 1” orange-red bells throughout the summer. (ABUDR)

**Abutilon ‘Huntington Pink’**
- Zones 9–11
- **° £**
- This dense, vigorous grower can reach 3’-10’ tall. A profusion of light pink bells, with deeper pink veins, covers the plant all summer. (ABUHP)

**Abutilon ‘Kristen’s Pink’**
- Zones 9–11
- **° £**
- Very heavy blooming with 2” soft pink bell flowers, braced with salmon, all season on upright plants growing 18-24” tall. Heat tolerance. **(ABUKP)**

**Abutilon ‘Savitzii’**
- **° £**
- This upright plant bears gorgeous, 1” orange-red bells throughout the summer. (ABUS)

**Abutilon pictum ‘Thompsonii’**
- Zones 9–11
- **° £**
- Small, yellow-orange bell flowers play second fiddle to showy, maple-leaf shaped foliage, illuminating creamy white with irregular green centers. Requires more shade than other varieties. **(ABUTS)**

**Agapanthus**

**Agapanthus x ‘Summer Skies’**
- Zones 6–10
- **° £**
- New! Stunning, strappy peniche blue flowers bloom in clusters mid-summer through early fall. Grows 24-36” tall and 24” wide with rich green strap-like foliage that contrasts well with the flowers. Improved hardness. **(AGASS)**

**Agastache**

**Agastache ‘Acapulco® Orange’**
- **° £**
- Brilliant sorbet orange flower spikes bloom in clusters mid-summer through Fall. One of the tallest of the group. **(AGAGN)**

**Alternanthera**

**Alternanthera ‘Red Thread’**
- **° £**
- From Pam Baggett of Singing Springs Nursery. This unique cultivar forms a neat mound of dark purple-red, fine, thread-like foliage. Grows 6-10” tall. **(ALTRT)**

**Alternanthera ‘True Yellow’**
- **° £**
- Brighter yellow. Compact and bushy habit. Good for beds and mixed containers. Grows 6-12” tall and 4-10” wide. **(ALTTY)**

**Alternanthera ‘Cognac’**
- **° £**
- The broad, chartreuse leaves of this variety contrast nicely with bold colors. Full sun makes leaves even brighter yellow. Compact and bushy habit. Great for beds and mixed containers. Grows 6-12” tall and 4-10” wide. **(ALCTF)**

**Alternanthera ‘Partytime’**
- **° £**
- A nice upright Alternanthera, with intense pink variegation on the leaves. A very attractive, low-growing bedding or container plant. Grows 6” tall throughout the growing season. **(ALTPA)**

**Alternanthera ‘Red Thread’**
- **° £**
- From Pam Baggett of Singing Springs Nursery. This unique cultivar forms a neat mound of dark purple-red, fine, thread-like foliage. Grows 6” tall. **(ALTPA)**

**Alternate® Series**

**Alternanthera ‘Crème de Menthe’**
- **° £**
- The broad, chartreuse leaves of this variety contrast nicely with bold colors. Full sun makes leaves even brighter yellow. Compact and bushy habit. Great for beds and mixed containers. Grows 6-12” tall and 4-10” wide. **(ALTPA)**

**Alternanthera ‘Joseph’s Coat’**
- **° £**
- Glossy, dark maroon leaves give it a rustic look that will add interest to any container or bed planting. Grows to 18” tall. **(ALTPA)**

**Alternanthera ‘Cognac’**
- **° £**
- The broad, chartreuse leaves of this variety contrast nicely with bold colors. Full sun makes leaves even brighter yellow. Compact and bushy habit. Great for beds and mixed containers. Grows 6-12” tall and 4-10” wide. **(ALTPA)**

**Alternanthera ‘True Yellow’**
- **° £**
- The broad, chartreuse leaves of this variety contrast nicely with bold colors. Full sun makes leaves even brighter yellow. Compact and bushy habit. Great for beds and mixed containers. Grows 6-12” tall and 4-10” wide. **(ALTPA)**

**Alternanthera ‘Cognac’**
- **° £**
- The broad, chartreuse leaves of this variety contrast nicely with bold colors. Full sun makes leaves even brighter yellow. Compact and bushy habit. Great for beds and mixed containers. Grows 6-12” tall and 4-10” wide. **(ALTPA)**
**Angelonia**

**Summer Snapdragon**

*Angelonia angustifolia* 'AngelFace® Blue Improved'®

Zones 9–11 • D

Large, deep purplish blue flowers. Slightly more compact and upright, with improved branching and performance.

**AngelMist™ Series**

Zones 9–11 • D

This series is one of the best choices for bump-turning retail color and unbeatable landscape performance. All varieties are naturally well branched, filling out combination planters and xeriscape color beds with loads of flowers, lasting all spring and summer into frost. They are all around performers! Non-spreading varieties grow 14–24” tall with a spread to 20”. Spreading varieties grow 4–10” tall with a spread of 12–20”. Very heat tolerant and tolerant to a variety of soil conditions. Even better, no deadheading or pruning required!

*Angelonia angustifolia* 'AngelMist® Spreading Dark Purple'® (PPAF)

Masses of dark purple flowers on spreading plants.

*Angelonia angustifolia* 'AngelMist® Spreading Pink'® (PP18818)

Pink-white bi-color flowers on plants with a spreading habit.

*Angelonia angustifolia* 'AngelMist® Spreading White'® (PP19034)

Clean white flowers on plants with a spreading habit.

*Angelonia angustifolia* 'AngelMist® Spreading Dark Purple'® (PPAF)

Masses of dark purple flowers on spreading plants.

*Angelonia angustifolia* 'Archangel Purple'

Large, dark magenta-rose flowers. Zones 9–11

*Angelonia angustifolia* 'Archangel Dark Rose'®

Large, dark magenta-rose flowers.

*Angelonia angustifolia* 'Archangel Pink'

Elegant, mauve pink blooms. (ANGRP)

*Angelonia angustifolia* 'Archangel Purple'

Purple flowers with white centers, speckled purple. (ANGP)

*Angelonia angustifolia* 'Archangel White'

Spikes of crisp white flowers. (ANGW)

**Anigozanthos**

**Kangaroo Paw**

*Anigozanthos* 'JoeJoe™ Orange'

A compact and floriferous series of Kangaroo Paw offering unique, velvety flowers in a range of colors blooming spring to fall. They look exceptional in a container or as a focal point in the summer garden. Grows 12-15”.

*Anigozanthos* 'JoeJoe™ Red'

*Anigozanthos* 'JoeJoe™ Yellow'

**Antirrhinum**

**Snapdragon**

*Antirrhinum majus* 'Snap Daddy Yellow'

Zones 7–10 • D

Bubble gum pink flowers! Grows 18-24” tall with a spread of 10-12”.

*Antirrhinum majus* 'Snap Daddy Pink'

Zones 9–11 • D

*Antirrhinum* 'Peachy Dragon™'

Peach and pink bi-color snap-dragon flowers with dark red inner ring. (ANTPD)

*Antirrhinum* 'Buttery Dragon™'

Buttery yellow snap-dragon flowers with dark red inner ring. (ANTBD)

**Argyranthemum**

**Marguerite Daisy**

*Argyranthemum frutescens* 'Butterfly'

Zones 9–11 • D

Ever-blooming, butter yellow marguerite daisies shine alone or mix sensationally in a summer container. Flowers bloom all summer on 12-18” stems, even in the hottest weather. They are also very cold tolerant. (ARGVB)

*Argyranthemum frutescens* 'Vanilla Butterfly®'

Gorgeous blossoms take on the colors of butter melting in the sunshine and pure-milk. Strong, heat tolerant, 12-24” upright plants for the sunny border or mixed in a colorful planter. Flowers bloom all summer, even in the hottest weather. (ARGVF)
Argyranthemum

**MADEIRA™ SERIES**

**ZONES 9-11**: 

Arguably the best performing Marguerite Daisy series available! Exhibiting a tight, well-branched habit, the Madeira’s are known for their near-ridiculous flower production and wide range of flower form and colors. Upright, rounded plants grow 12-18” tall and 16-20” wide. Space plants 10-12” apart.

**SILKY SERIES**

**ZONES 9-11**: 

You’ll love this series as much as the butterflies with its exceptional heat and drought tolerance and versatility. It is great in the garden and also makes an excellent cut flower, having a very long vase life. Grows 30” tall.

**ARGYRANTHEMUM** continued

**MARGUERITE DAISY**

Asclepias curassavica

**ZONES 9-11**

Beautiful, orange-red flower clusters bloom all summer long, atop 2-4’ stalks of attractive, lance-shaped foliage. This tropical beauty is native to the Monarch butterfly. (ARGAC)

**SILKY SERIES**

**ZONES 9-11**: 

You’ll love this series as much as the butterflies with its exceptional heat and drought tolerance and versatility. It is great in the garden and also makes an excellent cut flower, having a very long vase life. Grows 30” tall.

Asclepias curassavica ‘Silky Deep Red’

Said to be the deepest red of any Asclepias with warm bronze foliage. (ARGC)

Asclepias curassavica ‘Silky Gold’

Umbels of soft, golden yellow flowers bloom on sturdy stems. (ARGC)

**BACOPA**

**WATER HYSSOP**

**BETTY™ SERIES**

**ZONES 9-11**: 

Bettys series features exceptionally large flowers on plants with a very neat habit. Make great additions to mixed containers or can be planted alone.

Bacopa Betty™ Blue

Large, pale blue flowers. (BEGBB)

Bacopa Betty™ White

Large, clean white flowers. (BEGBW)

**SCOPIA™ SERIES**

**ZONES 9-11**: 

The unique, tropical appearance of this begonia makes it a must have! Dark green leaves are frost white, contrasted by green venation show-through. A reliable performer, it has minimal water requirements and is very low maintenance. It grows 12-18” tall with a spread of 16-18”.

Bacopa cordata ‘Scopia™ Great Pink Ring’

Early blooming, large flowers in the palate of pinks, with a purple center. (BEGPP)

Bacopa cordata ‘Scopia™ Great Purple’

Large purple flowers with yellow centers. (BEGP)

**BEGONIA**

**SPECIES AND HYBRIDS**

**Begonia ‘Cordova’**

Zones 9-11

Petite, cascading, burgundy leaves with clusters of white flowers opening from pink buds. 12” tall. Can handle a half day of sun. (BEGC)

**Begonia ‘Cordoba’**

Zones 9-11

Petite, cascading, burgundy leaves with clusters of white flowers opening from pink buds. 12” tall. Can handle a half day of sun. (BEGC)

**Begonia ‘Cordoba’**

Zones 9-11

Petite, cascading, burgundy leaves with clusters of white flowers opening from pink buds. 12” tall. Can handle a half day of sun. (BEGC)
**Brugmansia ‘Betty Marshall’**
- Zones 9 – 11 ·
- This exotic, 8-10’ plant works its magic to turn heads. All summer long, half flowers bloom in early summer on this 5’ tall plant. (BRUBM)

**Brugmansia aurea ‘Golden Queen’**
- Zones 9 – 11 ·
- Golden yellow flowers bloom two weeks earlier than ‘Namid’. Compact plants with excellent branching and a full, dense, semi-trailing habit. Grow 6-8” tall and 12-20” wide. (BRUGQ)

**Brugmansia x insignis ‘Pink’**
- Zones 9 – 11 ·
- Large, sweetly fragrant, trumpet flowers are pale pink at the base, transitioning to a rich salmon-pink at the edges. Blooms July-Nov. on 5-10’ plants that have large, pale green leaves. (BRATT)

**Brugmansia x insignis ‘Variegata’**
- Zones 9 – 11 ·
- This exotic, 8-10’ plant works its magic to turn heads. All summer long, half pendulous, pure white, elongated flowers hang from long, crinkly, white-marginated leaves. Perfect for tub plantings on the deck or patio. (BRATT)

**Brugmansia ‘Miner’s Claim’ PP15747**
- Zones 9 – 11 ·
- This B. suaveolens cross has 8-10” long, single, white trumpet flowers with just a hint of chartreuse at the base and a spicy fragrance. A compact and floriferous variety with masses of flowers blooming July-November on 6-9’ plants that have large, pale green leaves. (BRUBM)

**Calibrachoa ‘Superbells® Lemon Slice’**
- Zones 9 – 11 ·
- Large, pure white flowers with yellow centers late spring to mid-fall. Superbells® Neo offers large blooms on plants with a uniform, semi-mounding habit, along with great heat and drought tolerance, once established. Known for its great outdoor performance, early flowering and easy to control, compact, semi-mounding habit, along with great heat and drought tolerance, once established. (CALBLS)

**Calibrachoa ‘Million Bells® Cracking Fire’**
- Zones 8 – 11 ·
- A beautiful blend of small, dark orange and yellow flowers cascade from 6-12’ tall plants. From the Million Bells series known for lush-blooming, heat tolerant and disease resistant hybrids. Excellent in planters, mixed baskets and in the landscape. (CALMBCF)

**Calibrachoa ‘Swan River Daisy’**
- Zones 8 – 11 ·
- Grows 6-12” tall plants. From the Million Bells series known for lush-blooming, heat tolerant and disease resistant hybrids. Excellent in planters, mixed baskets and in the landscape. (CALBLS)

**Bidens ferulifolia ‘Namid Early Yellow’**
- Zones 9 – 11 ·
- Golden yellow flowers bloom two weeks earlier than ‘Namid’. Compact plants with excellent branching and a full, dense, semi-trailing habit. Grow 6-8” tall and 12-20” wide. (BRUGQ)

**Bidens ‘MiniFamous™ Neo White’**
- Zones 9 – 11 ·
- Stunning, deep velvet red flowers with contrasting black centers. (CALNP)

**Bidens ‘Beedance™ Painted Red’**
- Zones 9 – 11 ·
- Lustrous, lavender flowers, with complementary chartreuse eye, bloom continuously all summer. Shows excellent heat tolerance. 6-12” tall. (BRUGQ)

**Calibrachoa ‘MiniFamous™ Compact Safran’**
- Known for its great outdoor performance, early flowering and easy to control, compact, semi-mounding habit, along with great heat and drought tolerance, once established. (CALCF)

**Calibrachoa ‘Celebration Candy Bouquet’**
- Zones 8 – 11 ·
- Known for its great outdoor performance, early flowering and easy to control, compact, semi-mounding habit, along with great heat and drought tolerance, once established. (CALCQ)

**Calibrachoa ‘Million Bells® Coralberry Punch’**
- Zones 8 – 11 ·
- Coral-red blooms with red-black throats. (CALCB)

**Calibrachoa ‘Superbells® Blackberry Punch’**
- Zones 8 – 11 ·
- Deep purple blooms with a rich violet black throat. (CALBP)

**Calibrachoa ‘Superbells® Lemon Slice’**
- Zones 8 – 11 ·
- Bright lemon and white bi-color flowers on mounding and trailing plants. Tails up to 24”, (CALAP)

**Calibrachoa ‘Superbells® Pomegranate Punch’**
- Stunnig, deep velveld red flowers with contrasting black centers. (CALLS)
**CLEORENDRUM PASODO FLOWER**

Cleomodendrum myriocides ‘Ugandense’

Zones 9–11

6-8’s bush bearing butterfly-like flowers with clear blue petals all summer. (2014)

**COLORBLAZER® SERIES**

Color and performance are the name of the game with this new series. No coloration of the foliage varies depending on the amount of sun or shade provided. Their bold colors, late flowering nature and tolerance to varying light exposure makes them a must have!

**Coleus**

**PAINTED LEAVES**

**Coleus ‘Alabama’**

Large coleus with deep-brick red foliage, trimmed with yellow-green. 18-24” tall. Great for landscapes or combination baskets. (2014)

**Coleus ‘Amazon’**

Spectacularly ruffled, puckered and deeply lobed, pure chartreuse foliage. Growing 30-36”, it can stand alone or be used to liven up a sedate blue or green border. (2014)

**Coleus ‘Big Red Judy’**

This large coleus is stunning with its bold, vibrant red foliage. Grows 30” or taller and has good vigor; filling in areas quickly. Good heat and humidity tolerance. Great for beds and combination planters. (2014)

**Coleus ‘Black Magic’**

Small, mahogany-purple leaves outlined with lime-green scallops. (2014)

**Coleus ‘Chocolate Bark’**

Rich dark purple, medium leaves add appeal to shady and sunny sites alike. Hints of burgundy shown with full sun. Adds contrast to large combo planters and landscape plantings. 24-30” tall and 24” wide. (2014)

**Coleus ‘Creamy Pineapple’**

Zones 11-12

Truly electric with bright lemon and lime coloration creating a striking pattern on the leaves. Grows 14-20” tall and up to 24” wide. (2014)

**Coleus ‘Fishnet Stockings’**

Zones 10-11

Sure to liven up any summer planting, with chartreuse leaves that have a deep burgundy variegation creating a sexy “net” effect. Good heat tolerance, 24-36” tall. (2014)

**Coleus ‘Henna’**

Zones 10-11

A unique Coleus with strongly serrated foliage in shades of chartreuse to copper. Dark burgundy undersides. Grows 18-24” tall and to 16” wide. (2014)

**Coleus ‘Indian Summer’**

Zones 10-11

**Coleus ‘Inky Fingers’**

Zones 10-11

Dark red centers and bright green finger-like edges. 18-24” tall. (2014)

**Coleus ‘Kong™ Mosaic’**

Large, lime-chartreuse, scalloped leaves with mahogany center add a bold splash of color to summer containers and landscapes. (2014)

**Coleus ‘Kong™ Pizza’**

Zones 8-11

A striking mosaic pattern of purple, green and yellow! (2014)

**Coleus ‘Kong™ Red’**

Zones 8-11

Large chartreuse leaves have magenta-red heart surrounded by dark burgundy banding. Mounded, upright habit. (2014)
**Coleus**

**Painted Leaves**

**Coleus ‘Pink Chaos’**
- Zones: 10 – 11
- This might just be the reddest foliage of any coleus to date! Very well-branched and late to flower. Grows 18-24” tall and 16-24” wide. Vigorous plants with a record of superior performance.

**Coleus ‘Redhead’**
- Zones: 10 – 11
- Almost paisley pattern, starting with purple-red centers, outlined in green, enclosed with a red ring that has a light green edge.

**Coleus ‘Solar Flare’**
- Zones: 10 – 11
- Large, serrated, chartreuse leaves hold their color well and have an eye-catching webbed pattern. Vigorous and versatile. Low maintenance and high impact. Performs well in sun and shade. Grows 18-26” tall and 16-28” wide.

**Coleus ‘The Line’**
- Zones: 10 – 11
- Chartreuse to golden leaves with distinct, dark red midrib. **D**

**Coleus ‘Trusty Rusty’**
- Zones: 10 – 11
- A large-leaved selection with copper colored foliage that has gold trim. Late to flower and more vigorous than C. ‘Rustic Orange’. Grows 18-24” tall and 16-24” wide.

**Coleus ‘Wasabi’**
- Zones: 10 – 11
- Large, serrated, chartreuse leaves hold their color well and have an eye-catching webbed pattern. Vigorous and versatile. Low maintenance and high impact. Performs well in sun and shade. Grows 18-26” tall and 16-28” wide.

**Royal Hawaiian® Series**

**Colocasia**

**Taro or Elephant Ear**

**Colocasia esculenta ‘Black Magic’**
- Zones: 9 – 11
- Stunning, downward-facing, heart-shaped leaves are purplish black with nice venation. Grows 3-6’ tall and wide. Takes some shade.

**Colocasia esculenta ‘Maui Magic’**
- Zones: 9 – 11
- Glossy, dark grayish green, ruffled leaves start out with a purplish black cast, fading out to a deep olive green with age. The 2” long leaves emerge from purplish stems on dense, upright plants growing 3-4’ tall in northern regions of the U.S. and up to 6’ tall in warmer areas.

**Colocasia esculenta ‘Blue Hawaii’**
- Zones: 9 – 11
- Almost purple common with red veins. A large-leaved selection with copper colored foliage that has gold trim. Late to flower and more vigorous than C. ‘Rustic Orange’. Grows 18-24” tall and 16-24” wide. Vigorous plants with a record of superior performance.

**Colocasia esculenta ‘Diamond Head’**
- Zones: 9 – 11
- Chocolate (almost black) leaves reminiscent of ‘Black Magic’. The 24” leaves are ever so slightly wavy at the margins for added effect. A neat and tidy clumper, growing closer to 4’ tall, it will have huge impact without taking up huge space. A show-stopper!

**Cordyline**

**Palm Lily**

**Cordyline australis ‘Red Star’**
- Zones: 9 – 10
- A sub-tropical plant with reddish purple strap-like leaves. In the proper zones, it can grow from 3’-25’ tall, depending on climate. Fragrant, white flowers bloom in spring. Drought tolerant. Good for borders, beds and mixed containers.

**Cordyline banksii ‘Electric Flash’**
- Zones: 9 – 10
- A unique Cordyline banksii hybrid from Australia with a compact, clumping form providing side shoots, in lieu of the typical single-stemmed trunk. This allows for a more dense plant. Grows 4-8’ tall by 3-4’ wide in ideal conditions.

**Propogation of any plant reflecting a Patent Pending (PPAF) or Patent Issued (PP#) is strictly prohibited.**
**Coreopsis Series**

**TICKSEED**

**COLOROPSIS SERIES**

Zones 9 – 10 · ©

Coreopsis is the first annual Coreopsis on the market! 1-2” flowers in an array of eye-catching colors bloom all season on sturdy plants growing 12-18” tall. Long blooming and very floriferous, they’ll have your garden or planter dancing all summer long! A Sunny Border introduction bred by our friend and renowned Coreopsis breeder, Darrell Probst.

Coreopsis Coloropsis™ ‘Cha Cha Chá’®

Vibrant, golden flowers with dark burgundy eye and orange-black center cone. (CORCH)

Coreopsis Coloropsis™ ‘Five’®

A true ‘stand-out’ with white flowers that have a large dark burgundy eye and orange-bronze cone. (CORF)

Coreopsis Coloropsis™ ‘Limbo’®

White blooms with bronze center cone. (CORLI)

Coreopsis Coloropsis™ ‘Mambo’®

Pale pink flowers with dark magenta eye and gold center cone. (CORMA)

Coreopsis Coloropsis™ ‘Salsa’®

Golden flowers with a large, dark burgundy eye and gold-orange center cones. (CORS)

Coreopsis Coloropsis™ ‘Sunshine Suzie’®

The newest addition to the Coloropsis Series is like a sunny yellow version of ‘Limbo’. It shares all the same great traits of the series and is sure to brighten things up wherever planted! (CORSU)

**Cosmos**

Cosmos atrosanguineus ‘Chocamocha™’®

Zones 10 – 11 · ©

This improved form of the Mexican native chocolate Cosmos will grace any summer garden with its delicate, chocolate-scented, maroon flowers blooming mid-summer. Used more and more in containers for its great foliage texture and form. (COSCH)

**Cuphea**

**MEXICAN HEAT**

Cuphea hyssopifolia ‘Cocktail’

Zones 9 – 11 · ©

A dwarf shrub that is covered with small, purple-pink flowers through the season. Yellow-green, hyssop-like foliage forms a low compact mound. Grows 12-15” tall. Great in the front of a border or in containers or smaller beds. (CUPCO)

**Cyperus**

Zones 7 – 11 · ©

This popular tropical water plant also makes a great anchor for a combination planter. It grows 18-24” tall and has a very fine ivory and green variegation. (CYPUS)

**Dahlia**

Dahlia ‘Dalaya Shari’

Zones 8 – 11 · ©

Eye-catching fire engine red flowers with elegant, near black centers. Grows 18-24” tall. This variety is sure to brighten things up wherever planted! (DAHSH)

Dahlia ‘Dalaya Yogi’®

Early flowering and long flowering with charming semi-double, pink flowers that have dark burgundy centers. Blooms spring to fall on medium size plants with exceptional mildew resistance. A Fleuroselect Gold Medal Winner! (DAHDY)

Dahlia ‘Mystic Illusion’® (‘Knockout’)

Bright lemon yellow flowers, with dark centers, create a stunning contrast with the dark purple-black foliage. Grows 18-36” tall. Uses include combination containers, beds and landscapes. (DAHMI)

Dahlia ‘Starsister Crimson Picotee’®

Zones 8 – 11 · ©

Eye-catching fire engine red flowers with elegant, near black centers trimmed in gold. The flower color contrasts well with the dark, shiny mahogany-black foliage. Grows to 30” tall and 24” wide with a compact rounded habit. Ideal for containers, borders and planted in mass in the landscape. (DAHCP)

**Dahlia variabilis ‘Mystic Dreamer’® (‘Zone Ten’)**

Zones 9 – 11 · ©

Elegant, white flowers with pink stripes in the center of each petal. Blooms May-Oct. and has sharply cut, dark mahogany foliage. Grows 18-24” tall. From New Zealand. (DAHMD)

**Cynara cardunculus**

Zones 7 – 11 · ©

Foliage is deeply cut, gray-green above and white below, with prickly stems. Grows 6’ tall in the garden with beautiful, thistle-like blue-violet flowers blossoming mid-summer. Used more and more in containers for its great foliage texture and form. (CYNA)

**Cyperus Starburst**

Zones 7 – 10 · ©

This stunning new Cyperus is sure to brighten things up wherever planted! 1-2” flowers in an array of eye-catching colors bloom all season on sturdy plants growing 12-18” tall. Perfect for front to middle of an annual flower bed or border. (CYNCA)

**Fleuroselect Gold Medal Winner!**

Propagation of any plant reflecting a Patent Pending (PPAF) or Patent Issued (PP#) is strictly prohibited.
Diascia ‘Piccadilly™ Dark Red’

Diascia ‘Piccadilly™ Dark Red’ is a Diascia that bears large, dark red flowers 12-24” tall. (FUCBB)

Dianella tasmanica ‘Variegata’

Dianella tasmanica ‘Variegata’ is a variegated form of Dianella. Has arching, sword-shaped leaves that are light green with gold variegation. Deep purple berries on long stems in summer. (DIAPD)

Dahlia pinnata ‘Dahlietta™ Patty’

Dahlia pinnata ‘Dahlietta™ Patty’ is a dwarf hybrid with striking dark red flowers. Grows to 12” tall.  (DICSF)

Diascia

Diascia, also known as Twinflowers, is a genus of about 80 species of perennial herbaceous and subshrubby plants native to the Americas, Europe, and Asia. The flowers are usually tubular or campanulate and the leaves are narrowly ovate to lanceolate. Many Diascia species are cultivated as ornamentals for their color and form. Diascia typically have 6 petals, 6 sepals, 6 stamens, and one pistil. Diascia are easy to grow in full sun to part shade and are heat-tolerant and easy-care, working well in containers and in mixed beds.

Dichondra ‘Silver Falls’

Dichondra are ground covers that are often grown in containers. They form silver, silvery-green or blue-green mounds of foliage. They are heat-tolerant and easy-care, working well in containers and in mixed beds. Dichondra are great waterwise choices for summer with self-cleaning flowers and a nice, dense, mounded habit. Excellent heat-tolerance and easy care, working well in containers and in mixed beds.

Dichondra argentea ‘Silver Falls’

Dichondra argentea ‘Silver Falls’ is a Dichondra that spreads on a spreading plant that may grow as wide as 4’ in one season. Very heat and drought tolerant, it makes a nice hanging plant. (DIAPD)

Digitalis

Digitalis, also known as Foxglove, is a genus of about 20 species of herbaceous flowering plants native to Europe and Asia. The flowers of Digitalis are typically red, pink, purple, or white and are usually tubular. Many Digitalis species are cultivated as ornamentals for their color and form. Digitalis are heat-tolerant, easy-care, working well in containers and in mixed beds. Digitalis blooms summer into fall. Sun tolerant. (DIGIF)

Diastella

Diastella, also known as Ensete, is a genus of about 10 species of herbaceous flowering plants native to East Africa. The flowers of Diastella are large, reddish-purple, and has a strong, sweet fragrance. Diastella are heat-tolerant and easy-care, working well in containers and in mixed beds. Diastella blooms summer into fall. Sun tolerant. (DIATV)

Dianella

Dianella, also known as Gumpaste, is a genus of about 20 species of herbaceous flowering plants native to Europe and Asia. The flowers of Dianella are usually tubular or campanulate. Many Dianella species are cultivated as ornamentals for their color and form. Dianella are heat-tolerant, easy-care, working well in containers and in mixed beds. Dianella blooms summer into fall. Sun tolerant. (DIAPD)

Digitalis ‘Digiplexis ® Snow’ PPAF

Digitalis ‘Digiplexis ® Snow’ is a Digitalis that produces sprays of airy white flowers in early summer. (DIGIF)

Eranthemum

Eranthemum, also known as Silver Falls, is a genus of about 20 species of herbaceous flowering plants native to Europe and Asia. The flowers of Eranthemum are usually tubular or campanulate. Many Eranthemum species are cultivated as ornamentals for their color and form. Eranthemum are heat-tolerant, easy-care, working well in containers and in mixed beds. Eranthemum blooms summer into fall. Sun tolerant. (DIATV)

Ensete

Ensete, also known as Gumpaste, is a genus of about 3 species of herbaceous flowering plants native to East Africa. The flowers of Ensete are large, reddish-purple, and has a strong, sweet fragrance. Ensete are heat-tolerant and easy-care, working well in containers and in mixed beds. Ensete blooms summer into fall. Sun tolerant. (DIATV)

Euphorbia

Euphorbia, also known as Spurge, is a genus of about 1,500 species of flowering plants that are typically known for their spines, flowers, and interesting leaves. Many Euphorbia species are cultivated as ornamentals for their color and form. Euphorbia are heat-tolerant, easy-care, working well in containers and in mixed beds. Euphorbia blooms summer into fall. Sun tolerant. (EUPSH)

Euphorbia fulgens

Euphorbia fulgens is a Spurge that has red, orange, or yellow flowers on 8-16” tall by 10-14” wide plants. (EUPSH)

Euphorbia hypericifolia ‘Breathless™ White’

Euphorbia hypericifolia ‘Breathless™ White’ is a Euphorbia that blooms early spring. Dense, upright habit make Dahlietta™ dahlias perfect for use as indoor plants and as outdoor container plants. Attracts hummingbirds too! (EUPSH)

Fuchsia

Fuchsia, also known as Baby Bricat, is a genus of about 70 species of flowering plants native to South America. The flowers of Fuchsia are usually red, pink, purple, or white and are usually tubular. Many Fuchsia species are cultivated as ornamentals for their color and form. Fuchsia are heat-tolerant, easy-care, working well in containers and in mixed beds. Fuchsia blooms summer into fall. Sun tolerant. (FUCBB)

Fuchsia ‘Baby Bricat’

Fuchsia ‘Baby Bricat’ is a Fuchsia that blooms abundantly early summer to early fall with flowers that have royal purple corollas and red sepals. 12-24’ tall. Use in containers, window boxes, beds and borders. (FUCBB)

Fuchsia ‘Firecracker’ nov

Fuchsia ‘Firecracker’ is a Fuchsia that blooms abundantly early summer to early fall with flowers that have royal purple corollas and red sepals. 12-24’ tall. Use in containers, window boxes, beds and borders. (FUCBB)

Fuchsia ‘Gartenmeister Ronstedt’

Fuchsia ‘Gartenmeister Ronstedt’ is a Fuchsia that blooms abundantly early summer to early fall with flowers that have royal purple corollas and red sepals. 12-24’ tall. Use in containers, window boxes, beds and borders. (FUCBB)

Fuchsia ‘ShadowDancer ® ’

Fuchsia ‘ShadowDancer ® ’ is a Fuchsia that blooms abundantly early summer to early fall with flowers that have royal purple corollas and red sepals. 12-24’ tall. Use in containers, window boxes, beds and borders. (FUCBB)

Fuchsia ‘Silver Falls’

Fuchsia ‘Silver Falls’ is a Fuchsia that blooms abundantly early summer to early fall with flowers that have royal purple corollas and red sepals. 12-24’ tall. Use in containers, window boxes, beds and borders. (FUCBB)

Fuchsia ‘Summerurn ® ’

Fuchsia ‘Summerurn ® ’ is a Fuchsia that blooms abundantly early summer to early fall with flowers that have royal purple corollas and red sepals. 12-24’ tall. Use in containers, window boxes, beds and borders. (FUCBB)

Foxglove

Foxglove, also known as Digitalis, is a genus of about 20 species of herbaceous flowering plants native to Europe and Asia. The flowers of Foxglove are usually tubular or campanulate. Many Foxglove species are cultivated as ornamentals for their color and form. Foxglove are heat-tolerant, easy-care, working well in containers and in mixed beds. Foxglove blooms summer into fall. Sun tolerant. (DIAPD)
**Gomphrena**

Gomphrena ‘Fireworks’  
Zones 3 - 11  
A unique globe amaranth with large (4") hot pink blooms, tipped bright yellow. More floriferous than other gomphrenas with a very interesting growth habit!  
Grows 36-48" tall and wide and is very durable, drought tolerant and low-maintenance. A true "standout" in a bed, border, cutting garden or container!  

**Helichrysum**

Helichrysum petiolare ‘Limelight’  
Zones 8 - 11  
Double, creamy yellow blooms in summer, amid chartreuse foliage. A spreader, growing 12-18" tall with 24-36" long stems.  

Helichrysum petiolare ‘Variegatum’  
Zones 8 - 11  
This variegated form of the licorice plant has small, oval, grayish green leaves with white borders. Blooms Aug.-Sept. Grows 12-16" tall.  

**Heliotropium**

Heliotropium arborescens ‘Variegatum’  
Zones 8 - 11  
Lovely violet flowers with a vanilla fragrance bloom in summer over rich green, deeply ribbed foliage. Grows 15-18" tall.  

**Hebe**

Hebe ‘Variegata’  
Zones 8 - 11  
This beautiful variegated form is one of the best accent plants for containers! The showy foliage is creamy white edging and the pale lavender flowers bloom on and off throughout the summer. Grows 36" or taller. Heat and cold tolerant, taking almost any conditions!  

**Helichrysum LICORICE PLANT**

Helichrysum microphyllum ‘Silver Mist’  
Zones 8 - 11  
Similar to H. petiolare but with smaller, silver-leaved leaves and a more dwarf habit. Grows to 12" tall with a spread up to 24". Great in hanging baskets, containers and for use as an annual groundcover.  

Helichrysum petiolare  
Zones 8 - 11  
Evergreen sub-shrub that forms mounds of trailing silver-green shoots and gray felted leaves. Grows to 4" tall.  

**Hemizygia**

Hemizygia ‘Candy Kisses’  
Zones 8 - 11  
An adorable variety sure to brighten up any summer garden or container. Dome, upright clumps of small, flashy, green leaves have thick creamy white margins and pink flowers bloom in spring from dark purple upright stems. Grows to 24" tall and looks spectacular planted in mass. Very heat and drought tolerant.  

**Impatiens (New Guinea)**

Impatiens SunPatiens® ‘Compact Coral’  
Zones 10 - 11  
Purple, almost black heart-shaped leaves on a creeping vine. Great as an annual groundcover or in hanging baskets or containers. Grows 6-12" tall and can trail up to 72" in ideal conditions.  

Impatiens SunPatiens® ‘Compact Lilac’  
Zones 10 - 11  
An award-winning selection with lovely, chartreuse foliage that trails up to 40", exhibiting excellent heat tolerance and good vigor 6-10" tall. Great in window boxes, mixed containers and hanging baskets.  

Impatiens SunPatiens® ‘Compact Red’  
Zones 10 - 11  
This stunning, award-winning selection has blackish purple foliage trailing to 40". It is heat and drought tolerant and looks exceptional in window boxes, hanging baskets, containers and even in the landscape.  

**Ipomoea SWEET POTATO VINE**

Ipomoea batatas ‘Black Heart’  
Zones 9 – 11  
Purple, almost black heart-shaped leaves on a creeping vine. Great as an annual groundcover or in hanging baskets or containers. Grows 6-12" tall and can trail up to 72" in ideal conditions.  

Ipomoea batatas ‘Illusion™ Emerald Lace’  
Zones 9 – 11  
An award-winning selection with lovely, chartreuse foliage that trails up to 40", exhibiting excellent heat tolerance and good vigor 6-10" tall. Great in window boxes, mixed containers and hanging baskets.  

Ipomoea batatas ‘Illusion™ Midnight Lace’  
Zones 9 – 11  
Beautiful lime green to chartreuse leaves on creeping vines brighten things up wherever planted. Great as a "spiller" in combo planters and window boxes. Also works well along a border or wall. Grows 6-12" tall and can trail up to 72" in ideal conditions.  

Ipomoea batatas ‘Tricolor’  
Zones 9 – 11  
Ornamental creeping vine bearing maple-like leaves, in a blend of pink, green and white. Great as an annual groundcover or in hanging baskets or containers.

**IRESINE**

**Bloodleaf**

Iresine herbstii ‘Red Heart’

**NEW** This South American native has stunning, dark crimson-red, heart-shaped foliage with red venation. The well-branched plants grow to 20” tall, with an upright habit. Ideal for combinations, beds, mixed borders and both indoor and outdoor containers.

**ISOLEPSIS**

Isolepis cernua ‘Live Wire’

**FIBER OPTIC GRASS**

 Zones 8-10

Sure to liven up any shade or light shade location, whether planted in a container or in the garden. It also works well planted near water features or ponds as it thrives in moisture. Will also tolerate full sun with adequate moisture. The common name comes from the “fiber optic” look of the eye-catching influence. Mounding-forming with soft green blades. Grows just 6-12” tall with a spread up to 20”.

**LANTANA**

**BANDANA® SERIES**

 Zones 8-11

Bandana® series plants are very well-branched with a nice, uniform, mounding habit and offer significantly larger flowers than traditional Lantana varieties. These early flowering varieties come in a range of eye-catching colors. They grow 20-26” tall and 24-32” wide.

Lantana camara ‘Bandana® Samanthia’

zones 8-11

Bright, lemon yellow flower clusters complement the unique lime and cream variegated foliage. Semi-trailing habit. Grows to 18” tall.

**LANDMARK™ SERIES**

 Zones 8-11

Landmark™ is an outstanding line of landscape lantana that do extremely well in extreme heat, humidity and drought. They are reliably vigorous, resulting in nice full plants and blooms. The series offers a wide range of vibrant bloom colors, all with rich, dark green foliage. Uniform and very free-flowering. The plants recover quickly from rain and other stressful conditions. Grows 15-20” tall and 18-24” wide.

Lantana camara ‘Landmark™ Rose Glow’

Umbels of pastel pink and white flowers. (LANCS)

Lantana camara ‘Landmark™ Sunrise Rose’

Rose and yellow. (LANLS)

Lantana camara ‘Landmark™ Yellow’

Sunny yellow. (LANLY)

**LAVANDULA**

**LAVENDER**

Lavandula pinnata

zones 8-11

Feathery gray leaves with lavender spikes in summer. Grows 15-18” tall.

**LEONOTIS**

**LION’S EARS**

Leonotis leonurus

zones 9-11

A sub-shrub from Africa, which can reach 6’ without pinching. In late summer through fall, it produces whorls of bright orange flowers. Great complement to fall mums! (LITGW)

**LITHODORA**

Lithodora diffusa ‘Grace Ward’

zones 7-11

Early blooming with small, sky blue flowers that have contrasting white & dark blue spotting at the base of the lower petal. A vigorous grower with a nice trailing habit. Better heat tolerance than most Lithodora. Grows 4-10” and 16-20” wide in the garden. (ISOLW)

**LOBELIA**

**CARDINAL FLOWER**

Lobelia erinus ‘Lucia® Classic Dark Blue’

zones 9-11

True blue flowers bloom all season on plants with much better heat tolerance than many of the older Lobelia varieties. Grows just 6-8” with a semi-trailing, mounding habit. Great for hanging baskets, containers and as a groundcover. (LOBTB)

Lobelia erinus ‘Techno Heat® Light Blue’

zones 7-10

Early blooming with small, sky blue flowers that have contrasting white & dark blue spotting at the base of the lower petal. A vigorous grower with a nice trailing habit. Better heat tolerance than most Lobelia. Grows 4-10” and 16-20” wide in the garden. (LOBLB)

Lobelia erinus ‘Techno® Blue’

zones 7-10

Intense, cobalt blue flowers bloom all summer. Has a good mounding and trailing habit and will not melt down in the heat. 4-10” tall. (LOBLH)

**LOBULARIA**

**ALYSSUM**

Lobularia ‘Snow Princess®’

zones 9-11

Clusters of small white flowers bloom spring and summer on moundling, trailing plants with variegated green and yellow foliage. 4-6” tall with a spread of 18-24”. Heat tolerant. Attracts butterflies. (LOBLS)

Lobularia ‘Lavender Stream’

zones 9-11

Very floriferous with clusters of fragrant, small lavender flowers that darken with exposure to warm conditions. A “spiller” that is ideal for combination containers, hanging baskets and gardens. (LOBLS)

**LOBULARIA®**

**SNOW PRINCESS®**

zones 9-11

Lobularia ‘Frosty Knight™’

zones 9-11

Clusters of small white flowers bloom spring and summer on moundling, trailing plants with variegated green and yellow foliage. 4-6” tall with a spread of 18-24”. Heat tolerant. Attracts butterflies. (LOBLS)

Lobularia ‘Snow Princess®’

zones 9-11

Very floriferous with clusters of fragrant, small lavender flowers that darken with exposure to warm conditions. A “spiller” that is ideal for combination containers, hanging baskets and gardens. (LOBLS)

**LUMBROSA®**

**CRISP Alert**

Lumbrosa® ‘Cherry Red’

zones 7-10

This sub-shrub from Africa, which can reach 6’ without pinching. In late summer through fall, it produces whorls of bright orange flowers. Great complement to fall mums! (LITGW)

**LUMINOSITÉ®**

**RHODODENDRON®**

Rhododendron ‘Red Heart’

zones 8-11

Bloodleaf F

**Propagation of any plant reflecting a Patent Pending (PPAF) or Patent Issued (PP#) is strictly prohibited.**
**MANDEVILLA TRUMPET FLOWER**

**SUN PARASOL® SERIES**

- **Lotus x ‘Gold Flash’**
  - Zones 9 - 11
  - Exotic red-orange flowers with gold-yellow foliage that changes to the sun! Glaucous foliage. Great for combo planters. (MANSP)
- **Lotus x ‘Alice Du Pont’**
  - Zones 9 - 11
  - Somewhat vine-like plant with shiny oval leaves and funnel-shaped, pale pink flowers all season. Can be trimmed as a vine or will flush 5-6 ft. on a trellis. Takes some shade. Always keep warm. (MANAD)

**LYCIANTHES**

**BLUE POTATO BUSH**

- **Lycianthes rantonnetii ‘Nabel’s Knockout’**
  - Zones 9 - 11
  - Exotic red-orange flowers from the orange, that look like “fin-less” goldfish, blooming all season on plants with beautiful glossy thick leaves! Performs best in bright, filtered light but can be used outdoors in a warm, sheltered spot. Starts out upright and trails with age, making it useful in hanging baskets. Stems can grow up to 36” if not cut back. (LYCNK)
- **Lotus x ‘Gold Flash’**
  - Zones 9 - 11
  - Exotic red-orange flowers with gold-yellow foliage that changes to the sun! Glaucous foliage. Great for combo planters. (MANSP)
- **Lotus x ‘Alice Du Pont’**
  - Zones 9 - 11
  - Somewhat vine-like plant with shiny oval leaves and funnel-shaped, pale pink flowers all season. Can be trimmed as a vine or will flush 5-6 ft. on a trellis. Takes some shade. Always keep warm. (MANAD)

**MUSCARI**

**BANANA**

- **Musa ‘Basjoo’**
  - Zones 9 - 11
  - Said to be the most cold hardy banana in the world! Handles temperatures of 15-20°F in the ground and can even survive down to -40°F with proper protective mulching. Striking, height green leaves. Height vary in northern zones, but can reach 15’ in ideal conditions. (MUSBA)
- **Musa ‘Zebra’ (‘Rojo’) ZEBRA LEAF BANANA**
  - Zones 9 - 11
  - Huge, lance-shaped leaves, striped red, emerge from a thick central trunk. Can reach 36’ in a single season. Provides an incredible, jungle-like effect in a garden. Try it by your pool or pond. (MUSZB)
- **Musa Sun Parasol® ‘Original Pink’**
  - Zones 9 - 11
  - Luxurious white blossoms all summer and will not fade. (MUSBOP)
- **Musa ‘Perfume Deep Purple’**
  - Zones 9 - 11
  - Fragrant, star-shaped flowers are an intense, dark purple and bloom abundantly. Will grow to 20’ tall with a 15-16’ spread in full sun or less when planted in part shade. 2006 AAS Award Winner. (NICDPP)
- **Nicotiana ‘Perfume Deep Purple’**
  - Zones 9 - 11
  - Fragrant, star-shaped flowers are an intense, dark purple and bloom abundantly. Will grow to 20’ tall with a 15-16’ spread in full sun or less when planted in part shade. 2006 AAS Award Winner. (NICDPP)
- **Nicotiana ‘Starmaker Lime/Purple Bicolor’**
  - Zones 9 - 11
  - Pastel pink petals surround a dark lavender pomegranate center. (OSEC)
- **Nicotiana ‘Starmaker Purple’**
  - Zones 9 - 11
  - Silvery white petals surround a dark lavender pomegranate center. (OSEC)

**NEMESIA**

**‘Opal Innocence®’ SERIES**

- **Nemesia ‘Opal Innocence®’**
  - Zones 9 - 11
  - Enchanting, iridescent blooms in pastel shades of white, pale pink and lavender. Long blooming, fragrant and heat tolerant. 6-10” tall. Great for mixed containers and hanging baskets. (NEMIC)
- **Nemesia ‘Sunsatia®’ SERIES**
  - Zones 9 - 11
  - These fragrant plants, with brilliantly colored flowers, stand alone nicely or can be added to a basket or container combination for a tropical touch. In addition, they hold up well in both cool and hot temperatures. Grow 6-10”. (NICDP)
- **Osteospermum ecklonis ‘4D™ Silver’**
  - Zones 9 - 11
  - Formerly called 3D™. The extremely double nature of the 2” blooms is what gives this series its name. As if the great looking, multi-dimensional double nature of the 2” blooms are not enough, the flowers stay open round the clock! Grows to 12-16” tall and 18-24” wide. Bloom early spring into fall and can be used in containers, hanging baskets and borders. (OSTES)
- **Osteospermum ecklonis ‘4D™ Purple’**
  - Zones 9 - 11
  - Silvery white petals surround a dark lavender pomegranate center. (OSTEC)
- **Osteospermum ecklonis ‘4D™ Pink’**
  - Zones 9 - 11
  - Pastel pink petals surround a dark lavender pomegranate center. (OSTEC)
- **Osteospermum ecklonis ‘4D™ Silver’**
  - Zones 9 - 11
  - Silvery white petals surround a dark lavender pomegranate center. (OSTEC)
- **Nicotiana ‘Starmaker Bright Red’**
  - Zones 9 - 11
  - Pastel lavender-pink petals surround dark hot lavender pomegranate center. (OSTEC)

**NEMATANTHUS**

**Nematanthus glabra GOLDFUSION® PLANT**

- **Nematanthus glabra GOLDFUSION® PLANT**
  - Zones 9 - 11
  - NEW! The common name comes from the orange flowers, that look like “fin-less” goldfish, blooming all season on plants with beautiful glossy thick leaves! Performs best in bright, filtered light but can be used outdoors in a warm, sheltered spot. Starts out upright and trails with age, making it useful in hanging baskets. Stems can grow up to 36” if not cut back. (NEMGL)

**MUCUNGA**

**‘Original Crimson’**

- **Mucunaga ‘Original Crimson’**
  - Zones 9 - 11
  - Enchanting, iridescent blooms in pastel shades of white, pale pink and lavender. Long blooming, fragrant and heat tolerant. 6-10” tall. Great for mixed containers and hanging baskets. (NEMIC)
- **Nicotiana ‘Sunsatia® Cranberry Improved’**
  - Zones 9 - 11
  - Eye-catching shades of the pale lime to purple. (OSTEC)

**NICOTIANA**

**FLOWERING TOBACCO**

- **Nicotiana ‘Perfume Deep Purple’**
  - Zones 9 - 11
  - Fragrant, star-shaped flowers are an intense, dark purple and bloom abundantly. Will grow to 20’ tall with a 15-16’ spread in full sun or less when planted in part shade. 2006 AAS Award Winner. (NICDPP)
**Osteospermum ecklonis 'Blue Eyed Beauty'**

- Zones 9 – 11

- NEW Vibrant, pastel yellow daisies with contrasting blue eyes bloom in abundance spring through summer on compact, bushy plants, growing 10-14" tall and 12-18" wide. Excellent plant for patio containers and main plantings.

**Osteospermum 'Margarita Ruja Red'**

- Zones 10 – 11

- NEW From the series known for brilliant color and excellent heat and drought tolerance comes this gorgeous variety with wine red daisy-like flowers. Long-blooming spring to fall. Grows 15" tall with a 9" spread. Used in containers, window boxes, hanging baskets, beds and borders.

**Osteospermum 'Summertime' Sweet White**

- Zones 10 – 11

- NEW Large bright white daisies with purple eye bloom in mass late spring through summer on plants with sturdy branching and exceptional heat tolerance. Grows 8-10" tall with a compact, upright habit. Great for beds, borders and containers.

**Pelargonium sidoides**

- Zones 9 – 11

- D = deer resistant
- £ = Full sun/shade
- l = Full shade

- This unique, late spring to summer blooming Pelargonium bears beautifully ribbed and ruffled, heart-shaped, velvety blackish grey foliage. Tall, loose stems support radiant, red-purple flowers that contrast nicely with the dense foliage.

**Pelargonium x hortorum 'Cherry Sparkler'**

- Zones 9 – 11

- D = deer resistant
- £ = Full sun/shade
- l = Full shade

- NEW An eye-catching accent plant for decorative containers, combination planters or in the landscape. Grows to 30" tall.

**Pelargonium x hortorum 'Indian Dunes'**

- Zones 9 – 11

- D = deer resistant
- £ = Full sun/shade
- l = Full shade

- Attractive, deep burgundy blades of pink to dark burgundy. Attractive, deep burgundy foliage creates a spectacular display in the summer garden with dark burgundy blades with a striking green and white variegation. Grows to 36" tall in bloom.

**Pelargonium x hortorum 'Madame Langguth'**

- Zones 9 – 11

- D = deer resistant
- £ = Full sun/shade
- l = Full shade

- An eye-catching selection with magenta-red flower clusters that contrast nicely with the dark green variegated foliage with creamy white margins. Grows 2-3" tall with stunning purple foliage and dark red inflorescence. June-July. Looks great in containers.

**Pelargonium x hortorum 'Rubrum'**

- Zones 8 – 11

- D = deer resistant
- £ = Full sun/shade
- l = Full shade

- This new member of the Celebration Series features arching blades with a striking green and white variegation. Grows to 3' tall. This showy flowering plant, one of the series members, it looks spectacular as a specimen plant, in combinations or interplanted in gardens or the landscape.

**Pelargonium x hortorum 'Sky Rocket'**

- Zones 8 – 11

- D = deer resistant
- £ = Full sun/shade
- l = Full shade

- This popular fancy-leaved geranium blends charmingly and seamlessly with single orange-red flowers.
**PETUNIA EGYPTIAN STAR**

**GRAFFITI® SERIES**

Zones 9 – 11

These heat and sun lovers offer large clusters of star shaped flowers above rich green foliage. They are naturally well branched and exude forming with a rich uniform flowering habit, lending them for use in both in containers and gardens. (Zones 10 – 12)

**PETUNIA continued**

**PETUNIA® SERIES**

* Rhodea japonica Spindle Flower

* Zones 6 – 9 · 

An evergreen perennial with stunning, lily-like, thick deep green leaves, that form clumps to 1’ tall by 2’ wide. In fall, white flowers are overshadowed by foliage and clusters of crimson berries.

**PLECTRANTHUS**

**SWEDISH IVY**

* Plectranthus argentatus

* Zones 9 – 11 · 

Downy, oval leaves that are very desirable on 3’ well-branched bushes. Sky blue flowers, late summer until frost. Pale purple stems.

**Plectranthus argentatus ‘Bill House’**

Zones 9 – 11 · 

Its unique grayish green foliage, with cream variegation, makes this a great accent plant for containers, hanging baskets and gardens. Interesting pale blue flower spikes, blooming in late summer, add even more appeal! (PPLWH)

**Plectranthus ‘Mona Lavender’**

A fast grower producing gorgeous lavender flowers with purple markings spring, summer and autumn in warmer climates and summer in the northeast. 12-16” tall. Light shade or part sun is preferable. Tolerates full sun cooler areas and coastal regions. Flowers best on shorter days. Dark green, glossy foliage with purple undersides. Mixed containers and landscapes.

**PLECTRANTHUS**

**NEW!**

* Plectranthus ‘Mona Lavender’

* Plectranthus argentatus

* Plectranthus argentatus ‘Bill House’

* Plectranthus grandiflora ‘Happy Hour Deep Red’

* Plectranthus grandiflora ‘Happy Hour Tropical Mix’

* Plectranthus grandiflora ‘Happy Hour Banana’

* Plumbago auriculata (capensis)

* Plumbago auriculata ‘Alba’

* Portulaca grandiflora ‘Happy Hour Deep Red’

* Portulaca grandiflora ‘Happy Hour Tropical Mix’

* Portulaca grandiflora ‘Happy Hour Banana’

* Rhodea japonica

* Rhodea japonica Spindle Flower

Salvia

**SAFE**

**Salvia Amistad**

- Zones 8 – 11
- Dark purple flowers bloom from purplish black calyces, spring to frost. Compact and full habit. Said to be a cross of S. greggii and S. goossensii. 36 – 48” tall and 36” wide.

**Salvia argentea**

- Zones 6 – 10
- Giant, silvery gray, woolly leaves with white flowers, centered gold. Broomlike. 18 – 24” tall. [SALE]

**Salvia biebaphorphylla ’Diable’**

- Zones 8 – 11
- A deep red cultivar that blooms from June to frost. [SALE]

### CATHEDRAL™ SERIES

**Zones 8 – 11**

CATHEDRAL™ salvias are early blooming with larger flowers and a more stout habit than most Salvia of their kind. In addition, they are compact, well branched and very floriferous, producing masses of large flower spikes all season. They grow 12-18” tall and wide in the garden and slightly smaller in containers. [SALE]

**Salvia farinacea ’Cathedral™ Deep Blue’**

- Fast blooming spikes of rich blue flowers.

**Salvia farinacea ’Cathedral™ Sky Blue’**

- Light periwinkle flowers. [SALE]

**Salvia farinacea ’Cathedral™ White’**

- One of the parent whites of its kind! [SALE]

**Salvia coccinea ‘Lady In Red’**

- **SCARLET SAFE**
- Zones 8 – 11
- Eye-catching, bright scarlet red flowers bloom summer to frost. Unlike many annual Salvia, Lady In Red grows 2-3’ tall and requires very little deadheading, putting up a spectacular display in the summer flower bed. Also makes a nice center of focus plant for large containers. Afternoon shade preferred. [SALE]

**Salvia coccinea ‘Summer Jewel White’**

- Zones 8 – 11
- NEW From the Summer Jewel series comes this in-demand compact, white Salvia. Blooms prolifically late spring into Fall, growing to 24” tall and 12” wide. Upright habit. A 2015 All American Selections® Budding Plant Award Winner and also a winner with bees and hummingbirds! [SALE]

**Salvia farinacea ‘SallyFun™ Blue’**

- **BLUE SAFE**
- Zones 8 – 11
- Early blooming with dense spikes of deep blue flowers bloom on compact, well branched plants. 24” tall and 15” wide. Very heat and drought tolerant. Use in mixed containers and in beds. [SALE]

**Salvia greggi ‘Cherry Chief’**

- **AUSTRIA SAFE**
- Zones 8 – 11
- Slightly taller than the species, with striking, cherry-red flowers. [SALE]

**Salvia greggi ‘Desert Blaze’**

- **AUSTRIA SAFE**
- Zones 8 – 11
- Variegated form of the Texas native, with red-orange flowers. [SALE]

**Salvia guarantica ‘Black and Blue’**

- Zones 8 – 11
- Cobalt blue flowers strikingly accented with black calyces. 2’ tall. Does well in summer heat and blooms most of the season. [SALE]

**Salvia guarantica ‘Blackstock Blue’**

- **BLUE TYPE SAFE**
- Zones 8 – 11

### Salvia continued on next page
Salvia 'Indigo Spires' (farinacea x longispicata)

Zones 8 – 11  

Long blooming, magenta-purple, tubular flowers with flared lips and pinkish brown calyces on dark maroon stems. Medium green, serrated foliage with a dense habit. 30-40” tall. Discovered in Victoria, Australia and named for the fact that the discoverer wished to have a portion of the plant royalties go to Australian-based charities. (SALIS)

Salvia involucrata x 'Mulberry Jam'

Zones 8 – 11  

Shocking pink flowers bloom all summer on 3-4’ stems. More upright and smaller than species. (SALIM)

Salvia longispicata x farinacea

Mystic Spire Blue

Zones 8 – 11  

True blue flowers bloom in abundance all season on this unique, compact Salvia growing just 12-14” tall. Attractive dark green foliage. (SALMF)

Salvia microphylla 'Hot Lips'

White, fan-shaped flowers bloom all season with a consistent, semi-trailing habit. So floriferous and full, it’s been called “hedge-like”. Great for hanging baskets, containers and landscape use. 6-10” tall and 18” wide. (SALMB)

Salvia microphylla 'Hot Lips'

Baby’s age

Zones 7 – 10  

A true ‘pumilio’ with unusually large, sapphire blue flowers that will stand out among the rest. A great choice for hot, sunny spots. Can be used in containers or window boxes. (SALPPAF)

Salvia patens ‘Patio Deep Blue’

Zones 8 – 11  

A true ‘pumilio’ with unusually large, sapphire blue flowers that will stand out among the rest. A great choice for hot, sunny spots. Can be used in containers or window boxes. (SALPPAF)

Salvia involucrata x ‘Mulberry Jam’

Zones 8 – 11  

Endless clusters of glorious pink flowers bloom all summer on this trailing host favourite! Grows 6-12” tall. Good heat tolerance. A must for hanging baskets! (SALPPAF)

On a long blooming, magenta-purple, tubular flowers with flared lips and pinkish brown calyces on dark maroon stems. Medium green, serrated foliage with a dense habit. 30-40” tall. Discovered in Victoria, Australia and named for the fact that the discoverer wished to have a portion of the plant royalties go to Australian-based charities. (SALIS)

Salvia x jamensis ‘Cienega de Oro’

Zones 8 – 11  

Elegant, pale yellow flowers blooming all season. Grows 24-36” tall. (SALJS)

Scaevola

Fan Flower

Scaevola aemula ‘Topaz Pink Improved’

Zones 9 – 11  

Masses of dainty, deep violet-blue flowers bloom on plants with a nice, symmetrical, trailing habit. Grows 8-12” tall and exhibits good heat tolerance. An excellent choice for hanging baskets, it also works well in containers and beds. (SCATP)

Scaevola aemula ‘Topaz Pink Improved’

Zones 9 – 11  

Masses of dainty, deep violet-blue flowers bloom on plants with a nice, symmetrical, trailing habit. Grows 8-12” tall and exhibits good heat tolerance. An excellent choice for hanging baskets, it also works well in containers and beds. (SCATP)

Scaevola aemula ‘Bombay White’

Zones 9 – 11  

With fluted tips and pinkish brown calyces on dark maroon stems. Medium green, serrated foliage with a dense habit. 30-40” tall. Discovered in Victoria, Australia and named for the fact that the discoverer wished to have a portion of the plant royalties go to Australian-based charities. (SALIS)

Torenia

Summer Wave® Amethyst

Zones 9 – 11  

 ngừng

NEW!

A unique species. (SALMJ)

A popular tropical landscape plant from front face areas of the world. Eye-catching, bright bluish purple flowers bloom above the foliage all summer on shrub-like plants with narrow, velvety green foliage. Can grow 3-20” tall depending on what region it is grown in. In less-hardy regions, it typically grows to 3’. (SALUL)

Tibouchina

Glorious Bush

Tibouchina urvilleana

Zones 8 – 12  

NEW!

A popular tropical landscape plant from front face areas of the world. Eye-catching, bright bluish purple flowers bloom above the foliage all summer on shrub-like plants with narrow, velvety green foliage. Can grow 3-20” tall depending on what region it is grown in. In less-hardy regions, it typically grows to 3’. (SALUL)

Torenia ‘Yellow Moon ®’

NEW!

Torenia ‘Velvet Moon ®’

NEW!

Large, showy, purple-blue flowers bloom spring to fall on bushy plants with velvety narrow green leaves. Plants grow 36-48” tall and are ideal as a centerpiece for large containers or in mixed borders. (SALWD)

Torenia ‘Summer Wave ®’

NEW!

A popular tropical landscape plant from front face areas of the world. Eye-catching, bright bluish purple flowers bloom above the foliage all summer on shrub-like plants with narrow, velvety green foliage. Can grow 3-20” tall depending on what region it is grown in. In less-hardy regions, it typically grows to 3’. (SALUL)

Torenia ‘Mystic Spires Blue’

Zones 8 – 11  

Large, showy, purple-blue flowers bloom spring to fall on bushy plants with velvety narrow green leaves. Plants grow 36-48” tall and are ideal as a centerpiece for large containers or in mixed borders. (SALWD)

**Verbena**

Verbena ‘Aztec™ Violet Improved’
Verbena ‘Aztec™ Blue Velvet’
Verbena ‘Lanai ®  White’
Verbena ‘Lanai ®  Twister Pink’
Verbena ‘Lanai ®  Peach’

NEW
darker pink inside, forming a twister of sorts. Stunning! Unique flower clusters show pale pink to white around the edges and add a soft element to any summer combination. (VERLC)

Verbena ‘Lanai ®  Peach’
An excellent performer with exceptional powdery mildew resistance. The best trailing form with long, arching, 12-15” flat blades, edged white, mound up like garlic chives, its close relative. 18-20” stems bear a profusion of purple flowers formed in clustered umbels all season long. A great container plant. (VERBU)

Verbena ‘Lanai ®  White’
NEW: Elegant, clean white flower clusters. (VERBW)

Verbena ‘Homestead Purple’
AN oldie but goodie! A vigorous spreader, with clusters of beautiful velvety, rich purple flowers blooming June-Nov. Lush dark green foliage. Grows 10-12” tall with a spread to 24”. (VERBO)

Verbena ‘Superbena ®  Royale Chambray’
Exceptionally pretty with grand, pinkish burgundy flower heads. (VERSB)

Verbena ‘Superbena ®  Dark Blue’
Exceptional color! Non-stop color! Early flowering and floriferous with even distribution of flowerheads. Zones 7-11. (VERBU)

Verbena ‘Superbena ®  Burgundy’
Exceptionally pretty with grand, pinkish burgundy flower heads. (VERBU)

Verbena ‘Superbena ®  Royale Cherryburst’
NEW: Gorgeous dark pink flowers with white starburst centers. (VERBU)

**Zinnia**

Zinnia Profusion Yellow
Winner. (ZINOR)

Zinnia Profusion Orange
Brilliant orange flowers with brown centers. 1999 AAS Gold Medal Winner. (ZINOR)

Zinnia Profusion Coral Pink
Exquisite, rose pink, semi-double daisy-like flowers. (ZINOR)

Zinnia Profusion Yellow
Bright yellow blooms with bronze centers and thin bronze wash on mid rib extending out from the base of the petal. (ZINOR)

**Verbena bonariensis**

Verbena bonariensis ‘Little One’
This dwarf form of V. bonariensis shares all the same great traits as its parent, including its long bloom period and great heat and drought tolerance, but grows just 18-24” tall. Pinkish purple flowers bloom from spring to fall, fading to white over time. Medium green foliage. Good for the front to mid border and can be used in combination planters. Received the National Astronomer’s Top Performer Award in 2008. (VERBU)

Verbena ‘Homestead Purple’
An oldie but goodie! A vigorous spreader, with clusters of beautiful velvety, rich purple flowers blooming June-Nov. Lush dark green foliage. Grows 10-12” tall with a spread to 24”. (VERBO)

Verbena bonariensis
A very easy-to-grow Zinnia with a free-flowering nature, exceptional disease resistance and good cold, heat and humidity tolerance. Grows 12-15” tall, it will produce masses of 2” semi-double blooms all summer with gorgeous color! Perfect as a groundcover or for container planting. (VERBU)

Verbena ‘Superbena ®  Royale Cheriburst’
NEW: Gorgeous dark pink flowers with white starburst centers. (VERBU)

Verbena ‘Superbena ®  Natural’
An oldie but goodie! A vigorous spreader, with clusters of beautiful velvety, rich purple flowers blooming June-Nov. Lush dark green foliage. Grows 10-12” tall with a spread to 24”. (VERBO)

**Zinnia Profusion Coral Pink**
Exquisite, rose pink, semi-double daisy-like flowers. (ZINOR)

**Zinnia Profusion Orange**
Brilliant orange flowers with brown centers. 1999 AAS Gold Medal Winner. (ZINOR)

**Zinnia Profusion Yellow**
Bright yellow blooms with bronze centers and thin bronze wash on mid rib extending out from the base of the petal. (ZINOR)

**Tradescantia**

Tradescantia pallida ‘Purpurea’
Purple flower. Zones 7 – 12. (VERBU)

**Tulbaghia**

Tulbaghia violacea ‘Variegata’
Long and arching, 12-15” flat blades, edged white, mound up like garlic chives, its close relative. 18-20” stems bear a profusion of purple flowers formed in clustered umbels all season long. A great container plant. (VERBU)

**Tweedia**

Tweedia caerulea
Forms a 12-15” tall, sprawling tropical perennial with fuzzy green leaves and five-petaled, powder blue flowers all season. Perhaps the truest blue of any flower. (TWECA)

**Verbena**

Verbena ‘Aztec™ Wild Rose’
Rich dark blue with white center. (VERBV)

Verbena ‘Superbena ®  White Rose’
Coral-rose colored flowers. (VERBU)

Verbena ‘Superbena ®  Royale Cherryburst’
NEW: Gorgeous dark pink flowers with white starburst centers. (VERBU)

Verbena ‘Superbena ®  Royale Cheriburst’
NEW: Gorgeous dark pink flowers with white starburst centers. (VERBU)

Verbena ‘Superbena ®  Natural’
An oldie but goodie! A vigorous spreader, with clusters of beautiful velvety, rich purple flowers blooming June-Nov. Lush dark green foliage. Grows 10-12” tall with a spread to 24”. (VERBO)

Verbena ‘Superbena ®  Wild Rose’
Coral-rose colored flowers. (VERBU)

Verbena ‘Superbena ®  Royale Cherryburst’
NEW: Gorgeous dark pink flowers with white starburst centers. (VERBU)

Verbena ‘Superbena ®  Natural’
An oldie but goodie! A vigorous spreader, with clusters of beautiful velvety, rich purple flowers blooming June-Nov. Lush dark green foliage. Grows 10-12” tall with a spread to 24”. (VERBO)

Verbena ‘Superbena ®  White Rose’
Coral-rose colored flowers. (VERBU)

Succulents

NEW FOR 2019!

*Abra "Black Beauty*
*Bulbine frutescens*
*Crasula muscosa pseudopolygaloides*
*Cronkunteae 'Kwilu' new*
*Harringtonia violacea ssp. braunii*
*Kalanchoe luciae "Silver Tounges"
*Oxalis corniculata 'Bergen'*
*Phoradendron leucophorum*

Our succulent troughs and bowls have become very popular as they’re an easy way to provide a ready-made succulent garden to your customers. Better yet, they can be brought indoors over the winter months. See page 6 of our order form for the styles and sizes we are currently offering.

**ADROMISCHUS**

Adromischus cristatus

A compact, slow-growing succulent with bone white rosettes of somewhat triangular, greyish green leaves with slightly crinkled margins. Grows to just 4" tall with leaves to 1.5" long. Native to the eastern cape of South Africa. [ADACR]

**AEONIUM**

Aeonium arboreum 'Zwartkop' (A. arboreum 'Schwartzkopf')

LARGE PURPLE, AERIUM OR BLACK TREE AERIUM

Zones 8 - 11 · O

You will love this plant! Tight rosettes of deep mahogany red like a desert rose. Grows up to 10" tall. Extremely heat and drought tolerant. The yellow, star shaped flowers are held 8" above the foliage. Gives a tropical look to the garden. [AEOZK]

Aeonium 'Kiwi'

Zones 8 - 11 · O

Spoon-shaped, fleshy rosettes with pale yellow to green centers trimmed with red. Yellow flowers bloom in summer (Grows 3' tall to 2' wide). Drought tolerant once established. Great for rock gardens or container planting. [AEOZK]

Aeonium 'Purple Robe'

Zones 8 - 11 · O

Similar in color to Aeonium 'Zwartkop' with a very solid root system and strong stems. Extremely heat and drought tolerant. Fine alone or in combination planters. [AEOZK]

**AGAVE**

Century Plant

Agave americana

'Mediopicta Alba'

Zones 9 - 11 · O

A stunning selection of Mexican Agave that has glaucous leaves with a wide creamy white center stripe. Grows in ideal conditions and climate, it can grow up to 4' tall and 3-6' wide but in northeast regions of the U.S. it is closer to 2' by 3' at maturity. [AGAPA]

Agave americana ssp. protoamericana

Zones 7 - 10 · O

Identified here by Tony Avent himself! This rare beauty is a genetic combination of both A. americana and A. scabra. The result is a lethally spiky, powdery blue beauty. Upright clumps under 4' tall and wide. [AGAPA]

**AGAVE continued**

Agave desmettiana

Zones 9 - 11 · O

Upright, arching, pale blue-green leaves with minimal spines on rosettes growing 3' tall and 3' wide. Planted in ideal conditions, mature plants produce clusters of yellow flowers on tall stalks in 10 years or more. Once the plant produces a flower it will die, leaving offsets or bulbils that can be planted. The Agave was given the common name of Century Plant because of the long time it takes to bloom. [AGAPA]

Agave parryi 'Cream Spike'

Zones 7 - 10 · O

‘Zwartkop’ with a very solid root system and strong stem. Extremely heat and drought tolerant, fine alone or in combination planters. [AGAPA]

Agave parryi

Zones 9 - 11 · O

This parentage of this agave is questionable but the plant is not! Some say it is a cultivar of A. parryi, which it does highly resemble. In any event, it is a compact form with a 1' wide, 4' tall rosette of glaucous leaves near black teeth and spines and wide, irregular cream margins. Makes a great container plant! [AGAPA]

Agave parryi ssp. huachucensis

Zones 9 - 11 · O

The wide, greyish blue leaves of this popular Agave form a formal, symmetrical rosette. Each rounded leaf terminates with a dark pointed spike. Native to Durango, Mexico. A classic and favorite among agave collectors. Grows to 10’ x 18” with maturity. [AGAPA]
Aloe 'Black Beauty' Zones 9 – 11

This South African native is an easy-care, fast growing succulent with greyish green, fleshy leaves that have a thin red margin. Reddish tubular orange-red to yellow bell-like flowers bloom in clusters June-Aug, on tall, sturdy stems. A strong grower with your round interest outside in the summer landscape or in containers and inside as a houseplant over winter. Growing to 24” tall and up to 36” wide. (ZS10)

Aloe saponaria Zones 9 – 11

A species of Aloe native to eastern South Africa, Botswana and Zimbabwe. White spotted, pale green, lance-shaped succulent leaves have sharp, reddish brown teeth. 18” by 18” rosettes produce a multi-branched, 2’ stem with tubular, reddish orange flowers in spring. The sap should not be used as you would Aloe vera, since it is said to be a skin irritant. Very drought tolerant but will benefit from watering during hot, dry periods. (ALOSA)

Aloe ‘Grassy Lassie’ Zones 9 – 11

A compact, clumping aloe with narrow, dark green grass-like leaves with fine white-toothed margins. Long flowering with bright orange flowers on stems to 24” tall. Grows to 12” tall and wide. Great for tropical landscape use. (ALOGZ)

Aloe ‘Snow White’ Zones 9 – 11

A new variety of Aloe vera with delicate green leaves reminiscent of Aloe. Long flowers stalks rise above the foliage in spring and again in autumn. Delicate buds have a unique green center stripe, opening to orange, star-shaped flowers with frilly yellow stamens. (ALOWF)

Aloe juvenna Zones 10 – 12

A dwarf aloe from Kenya with an upright habit that arches with maturity. Small rosettes of toothed, green succulent leaves with creamy white flecking produce many suckers. In summer heat, leaves transition to brownish-green. Bright coral pink flowers mid-late summer on non-branching stems. Sometimes called Aloe zamthecica. 1’ tall by 3’ wide. (ALOJU)

Aloe vara Zones 9 – 11

A species of Aloe native to eastern South Africa, Botswana and Zimbabwe. White spotted, pale green, lance-shaped succulent leaves have sharp, reddish brown teeth. 18” by 18” rosettes produce a multi-branched, 2’ stem with tubular, reddish orange flowers in spring. The sap should not be used as you would Aloe vera, since it is said to be a skin irritant. Very drought tolerant but will benefit from watering during hot, dry periods. (ALOSV)

Aloe ‘Snow White’ Zones 9 – 11

There is not much information available on this hybrid but one thing is for certain – it’s beautiful! It may get its name from the fact that it is somewhat dewy in habit growing about 5”. It has dark green pointed leaves that are broad the base, with an eye-catching, linear white pattern. (ALOWS1)

Aloe ‘Black Beauty’ Zones 9 – 11

A compact aloe with light green, thick, fleshy leaves that are heavily spined with linear white markings. The spines are white on the leaves, looking more like a white aloe with green spines. Grows to 6” tall. Like Aloe vera, the sap can be used to treat burns. (ALOBB)

Aloe White Fox Zones 7 – 9

A compact aloe with light green, thick, fleshy leaves that are heavily spined with linear white markings. The spines are white on the leaves, looking more like a white aloe with green spines. Grows to 6” tall. Like Aloe vera, the sap can be used to treat burns. (ALOWF)

Aloe ‘Grassy Lassie’ Zones 9 – 11

A compact, clumping aloe with narrow, dark green grass-like leaves with fine white-toothed margins. Long flowering with bright orange flowers on stems to 24” tall. Grows to 12” tall and wide. Great for tropical landscape use. (ALOGZ)

Aloe ‘Snow White’ Zones 9 – 11

**Succulents**

**DYCKIA**

**DYCKIA x 'Cherry Coke'**

*Zones 9 – 11*  
A great example of an exquisite Echeverial 12-16" wide rosettes of pinkish lavender leaves with bright pink edging. The leaves transition in color from the outside of the rosette to the inside, giving a glowing appearance. Dark orange-red flowers bloom in summer. (GRAPFL)

**Echeveria elegans 'Grey Red'**

*Zones 9 – 11*  
Attractive, soft silver-green rosettes have purple blushed tips. Produces offsets freely. Bright yellow flowers bloom early to mid spring Grows to 6” tall. (ECHGR)

**EDWINIA**

**Echeveria prolifica**

*MEATY FIRM GROWER*  
Echeveria vallisneri 'Topsy Turvy'  
*Zones 8 – 11*  
Attractive, soft silver-green rosettes have purple blushed tips. Produces offsets freely. Bright yellow flowers bloom early to mid spring Grows to 6” tall. (ECHGR)

**ECHVERIA**

**Echeveria 'Afterglow'**

*NEW AND CHICKS*  
A glowing example of an exquisite Echeverial 12-16" wide rosettes of pinkish lavender leaves with bright pink edging. The leaves transition in color from the outside of the rosette to the inside, giving a glowing appearance. Dark orange-red flowers bloom in summer. (GRAPFL)

**Echeveria 'Grey Red'**

*Zones 9 – 11*  
Attractive, soft silver-green rosettes have purple blushed tips. Produces offsets freely. Bright yellow flowers bloom early to mid spring Grows to 6” tall. (ECHGR)

**Echeveria nodulosa**

*Zones 9 – 11*  
Originating in Mexico, this succulent forms glaucous rosettes of pointed leaves with dark red striping in the mid leaf and around the margins. Grows up to 20” tall at maturity. Pale yellow flowers with red markings bloom in summer on 2’ stems. A true show-stopper!(ECHPP)

**Echeveria 'Perle von Nurnberg'**

*Zones 9 – 11*  
A true “pearl” with medium-size bluish green and plum rosettes growing up to 8” tall and 12” wide. Coral pink flowers with yellow interiors bloom on 12” stems in summer. Great in decorative pots, mixed containers and as a seasonal addition to the rockery. (ECHPO)

**Echeveria shaviana 'Pink Frills'**

*Zones 9 – 11*  
It’s all in a name! Rosettes of glaucous succulent leaves that start out with a mauve hue, transitioning to bluish green leaves with prominent pink frilled margins with maturity. Pinkish orange flowers bloom along tall arching stems in summer. Grows 6-8” tall and up to 12” wide and produces offsets similar to boms and chicks. (ECHPK)

**FAUCARIA**

**Faucaria tuberculosa**

*ZONES 10 – 12*  
This South African native is a clump-forming, succulent that has very fleshy, triangular leaves with stout teeth. Very easy to grow. Yellow flowers bloom on short stems late summer into fall. (ECHFA)

**GASTERALOE**

**Gasteraloe 'Green Ice'**

*ZONES 9 – 11*  
A unique variety with broad, thick leaves with stunning coloration. The dark green leaves thicken with age and have icy pale green margins and spotting. Elongated tubular orange and chartreuse flowers bloom up and down tall stalks from center of the plant in spring. Grows to 12” in diameter. Makes a great indoor plant or outdoor patio or rock garden plant during warmer months. (ECHGR)

**GASTROPODALE**

**Graptoveria 'Fred Ives'**

*ZONES 9 – 11 – £*  
A unique variety with broad, thick leaves with stunning coloration. The dark green leaves thicken with age and have icy pale green margins and spotting. Elongated tubular orange and chartreuse flowers bloom up and down tall stalks from center of the plant in spring. Grows to 12” in diameter. Makes a great indoor plant or outdoor patio or rock garden plant during warmer months. (ECHGR)

**Graptoveria 'Debbie'**

*ZONES 9 – 11 – £*  
This succulent with bluish green rosettes trimmed in coral makes this plant a great seasonal addition for the rockery. (ECHGR)

**Graptoveria 'Fred Ives'**

*ZONES 9 – 11 – £*  
This striking variety resulted from a cross of Dyckia platyphylla and D. 'Carlsbad' It produces a rosette of spiny, arching, dark reddish brown leaves. Grows to 1’ tall. (ECHPP)

**HAUHOWLIA**

**Haworthia margaritifera**

*ZONES 10 – 12*  
One of the largest species of the this South African native genus, H. margaritifera has long, pointed, fleshy dark green leaves with white tubercles. The aloe-like leaves grow in rosettes on plants growing 4-8” tall and 12” wide. Insignificant white flowers bloom in spring. Great for shady summer rock gardens, patio containers or as house plants. (ECHFA)

**Haworthia retusa**

*ZONES 9 – 10*  
Sometimes called the Window Succulent, this South African native forms dark green rosettes to 6” in diameter, with stout, translucent, pale green leaves growing up to 2” long. The leaves almost appear, over-stuffed or puffed and have clear white lines, adding to it’s intrigue. The more sun, the more coloration and lines. Show, small white flowers with green stripes bloom in late spring. (ECHFA)

**Haworthia ‘Pink Frills’**

*ZONES 9 – 11*  
Small rosettes of elongated, triangular leaves are fleshy and have white tubercles forming an interesting banded pattern. Good for rock gardens or containers. White flowers bloom in spring. Drought tolerant. (ECHFA)

**Haworthia fasciata**

*ZONES 9 – 11*  
Small rosettes of elongated, triangular leaves are fleshy and have white tubercles forming an interesting banded pattern. Good for rock gardens or containers. White flowers bloom in spring. Drought tolerant. (ECHFA)

**Haworthia ‘American Beauty’**

*ZONES 9 – 10 – £*  
This attractive hybrid of Haworthia and Haworthia pumila (maxima) produces compact succulent rosettes with raised white spotting on the leaves. (ECHFA)

**HAWORTHIA 'American Beauty'**

*ZONES 9 – 10 – £*  
This attractive hybrid of Haworthia and Haworthia pumila (maxima) produces compact succulent rosettes with raised white spotting on the leaves. (ECHFA)

**Haworthia fasciata**

*ZONES 9 – 11*  
Small rosettes of elongated, triangular leaves are fleshy and have white tubercles forming an interesting banded pattern. Good for rock gardens or containers. White flowers bloom in spring. Drought tolerant. (ECHFA)

**Haworthia retusa**

*ZONES 9 – 10*  
Sometimes called the Window Succulent, this South African native forms dark green rosettes to 6” in diameter, with stout, translucent, pale green leaves growing up to 2” long. The leaves almost appear, over-stuffed or puffed and have clear white lines, adding to it’s intrigue. The more sun, the more coloration and lines. Show, small white flowers with green stripes bloom in late spring. (ECHFA)

**FAUCARIA**

**Faucaria crenata**

*ZONES 9 – 11*  
A clump-forming, succulent that has very fleshy, triangular leaves with stout teeth. Very easy to grow. Yellow flowers bloom on short stems late summer into fall. (ECHFA)

**FINESIA**

**Gasteraloe 'Green Ice'**

*ZONES 9 – 11*  
A unique variety with broad, thick leaves with stunning coloration. The dark green leaves thicken with age and have icy pale green margins and spotting. Elongated tubular orange and chartreuse flowers bloom up and down tall stalks from center of the plant in spring. Grows to 12’ in diameter. Makes a great indoor plant or outdoor patio or rock garden plant during warmer months. (ECHGR)
**Haworthia continued**

*Haworthia venosa ssp. tessellata*

**New!** Rosettes of flashy, triangular, grayish green leaves with a notched pattern formed by the veins. Tubular greenish white flowers bloom in racemes on 16-18” stems. Winner of the prestigious Royal Horticultural Society Award of Garden Merit. (HAWTE)

**Kalanchoe**

*Kalanchoe bracteata* ‘Silver Teaspoons’

**New!** Compact, small succulent with 2” metallic, silvery leaves shaped like oval spoons coming to a point at the tip. (KALST)

*Kalanchoe manginii* ‘Mirabella’

This unique variety of Kalanchoe has clusters of reddish orange bell-type flowers blooming from the 14-18” stems over succulent foliage in winter. Can be used in containers, gardens and even hanging baskets. (KALCH)

*Kalanchoe pumila* ‘Silver Gray’

A very eye-catching selection with rosettes of silvery gray succulent leaves that are scalloped around the tips. Leaves take on a rose tint with maturity. Grows 6-10” tall at maturity. Dark pink, star flowers bloom through summer. Very heat tolerant. (KALCH)

*Kalanchoe tomentosa* ‘Chocolate Soldier’

**New!** This Madagascar native, is a beautiful succulent with dense, fuzzy looking leaves. The gray-green leaves have margins and tips with dark brown notching. Grows to 18” tall in its native habitat. Green yellow bell-shaped flowers. (KALCH)

*Kalanchoe tomentosa* ‘Chocolate Soldier’

**New!** Native to Madagascar, this Kalanchoe’s oblong leaves have a greater amount of brown fur adhering than the species. Very easy to grow and requires little care. (KALCH)

**Mammillaria**

*Mammillaria plumosa* ‘Feathery Cactus’

**New!** This native of Northeastern Mexico is one of the friendliest members of the cacti family. It is due to its soft white, feathery spines that shield its green body almost completely. Low growing mounds are dense and clumping, growing just 2-3” tall, with a spread to 15”. Attractive flowers are white to cream in color with satiny look and occasional pink mid- ribs. (ORODC)

**Manfreda**

*Manfreda x ‘Bloodspot’*

**New!** An unlikely member of the cactus family, these tropical plants look more like a rose shrub with large leaves on thorny stems. Lovely bright dark pink flowers are borne in clusters from buds that look similar to that of a rose. Red, pear-shaped fruit are produced near flowers in the warmer months. Grows 12-18” tall and wide. Likes to be kept dry in the winter. (POAFR)

**Opuntia**

*Opuntia microdasys var. pallida*

Native to Northeastern Mexico is one of the friendliest members of the cacti family. This is due to its soft white, feathery spines that shield its green body almost completely. Low growing mounds are dense and clumping, growing just 2-3” tall, with a spread to 15”. Attractive flowers are white to cream in color with satiny look and occasional pink mid- ribs. (ORODC)

**Pilea**

*Pilea microphylla* ‘Variegata’

**New!** Stunning! Bright cherry red stems have small, green, oval leaves with white margins. Looks like a small jade plant. Easy to grow. If it gets too big, it responds readily to pinching. Great as a houseplant, a container plant, in combination with other succulents or alone. (PORAF)

**Portulacaria**

*Portulacaria afra* ‘Variegata’

**Variegated Dwarf Jade**

**New!** Stunning! Bright cherry red stems have small, green, oval leaves with white margins. Looks like a small jade plant. Easy to grow. If it gets too big, it responds readily to pinching. Great as a houseplant, a container plant, in combination with other succulents or alone. (PORAF)

**Orostachys**

*Orostachys iwarenge* ‘Chinese Dance Capi’

**Chinese Dance Capi**

**New!** Blushy gray rosettes of succulent foliage produce offsets, resulting in a low, dense, spreading mat to 12”. The same comes from the cone-shaped spines (to 6” tall) that emerge in spring from the rosettes, blossoming with pink & white flowers late summer fall. Tall jaws to repeat the show every year. Very cool! (PORAF)

**Pereskia**

*Pereskia grandiflora* (Chinese Dunce Cap)

**New!** Great as a houseplant, a container plant, in combination with other succulents or alone. (PORAF)
**RHIPSALIS**

*Rhipsalis teres*  
**Mistletoe Cactus**  
Zones 10 – 11  
Multitudes of cascading, cylindrical, jointed stems create a unique coral-like texture that lends itself to hanging baskets or planters. Lightly scented, creamy white flowers emerge from the tips of the stems in summer and fall.  

**SEDUM**

*Sedum japonicum ‘Tokyo Sun’*  
**Dwarf Stonecrop**  
Zones 8 – 11  
Fine textured, brilliant gold foliage with a low growing, mounding habit. Grows 2-4” tall with a spread to 32”. Makes a nice looking filler for containers, adding bright contrast and texture.  

*Sedum nussbaumerianum*  
**New**  
Cylindrical foliage turns a magnificent coppertone color in the sun. Pure white flowers cover the foliage Jan.-May. Grows 3-6” tall with a spread of 6-8”. Perfect in containers as a spiller.  

**SENECIO**

*Senecio mandraliscae ‘Blue Chalk Sticks’*  
**Groundsel**  
Zones 9 – 11  
A very appropos name for this variety with its upright, elongated blue leaves. Small white flowers bloom mid-summer. A spreading form growing 12-24” tall and up to 36” wide. Works well in combination planters.  

**TEPHROCACTUS**

*Tephrocactus articulatus*  
**Paper Spine Cactus**  
Zones 8 – 11  
**New**  
A popular South American cactus that gets its common name from the white, oddly shaped, flattened spines. The unique look of the spines and the segmented stems make this species a great addition to any succulent garden or xeriscaped border. White and yellow flowers bloom late spring to mid-summer. Grows 6-12” tall. Handles cold a little better than most cactus. Plant in well drained, gritty, humus rich soil.  

**Succulent Assortment**

From the more well-known Agave and Aloe selections to lesser known genera like Haworthia and Rhipsalis, this assortment of succulents is sure to please all connoisseurs. Pick from a great mix of colors and textures well suited for container planting and more!  

---

**NEW FOR 2016!**  
Chinese Basil/Beefsteak Plant  
(*Perilla frutescens*)  
Chinese Anise (*Anethum graveolens ‘Hedger’)  
SBN Introduction Ocimum x citriodorum ‘Pesto Perpetuo’
African Blue Basil (Ocimum africanum)  
Zones 9 – 11  ·
This ornamental herb emits a sweet camphor scent and is admired for its beautiful, 3” foliage. New foliage is purplish with reddish purple undersides and hairy violet stems. With maturity, color fades to green with pronounced purple veins. (Ociss)

Bush Basil (Ocimum minimum)  
Zones 9 – 11  ·
A dwarf basil with a nice sweet flavor and delightful, clove-scented leaves. It has many culinary uses, especially in combination with tomatoes. Grows 12-24”. Basil is very sensitive to the cold, so care should be taken when temperatures vary. (Ociss)

Columnar or Greek Basil (Ocimum x citriodorum ‘Genette’)  
Zones 9 – 11  ·
A columnar form of culinary basil that reaches 2-3’ tall. Can be used in cooking just like any other basil. Forms a nice hedge when planted close together. (Ociss)

Compact Genovese (Ocimum basilicum ‘Genovese Compact’)  
Zones 9 – 11  ·
An eye-catching genotype-type basil with dark green leaves on plants with a compact habit. Flavor and appearance is the same as genovese basil but with a more compact nature. This means it is still perfect for pesto, caprese salad and more! Grows 16–18” tall and works well in containers. (Ociss)

Lemon Basil (Ocimum x citriodorum ‘Yellow Lemon’)  
Zones 9 – 11  ·
This plant, hailing from Thailand, stands up well to humid, warm weather producing fragrant, elongated pale green leaves. The lemon scented leaves lend themselves nicely to many cooked Asian dishes with poultry and fish. Grows 18-24” tall. (Ociss)

Lime Basil (Ocimum basilicum var. citriodorum ‘Lime View’)  
Zones 9 – 11  ·
Bright green leaves impart a tasty lime flavor and fragrance. Reaches 12” tall with lovely pink flowers. Pinching leaves keeps the plant compact. Perfect for adding a delicate lime flavor to salads &/or dressings, fish, poultry and much more. (Ociss)

Purple Basil (Ocimum basilicum ‘Purple Improved’)  
Zones 9 – 11  ·
This eye-catching genotype type basil has leaves in shades of dark burgundy to black with deep turned tips. Flowers bloom mid-late summer. If flowers are not desired and a compact habit is desired, keep the tops of the basil trimmed. Grows 15-20” tall. (Ociss)

Spicy Globe Basil (Ocimum basilicum ‘Spicy Globe’)  
Zones 9 – 11  ·
A compact form having the same great flavor as sweet basil but with smaller leaves. Just pinch off what you need. No need to chop or cut, as it’s small enough to use as is. White flowers above its rounded form. Reaches 12”, (Ociss)

Variegated Basil (Ocimum x citriodorum ‘Pesto Perpetuo’)  
Zones 9 – 11  ·
This greek columnar basil sport is upright, reaching 4’ with light green foliage, edged creamy white. Lives as a tropical perennial when brought indoors in winter. Since it does not flower, this is a great culinary basil, keeping its taste all year. A Sunny Border Nurseries introduction! (Ociss)

Chinese Basil (Perilla frutescens)  
Zones 3 – 9  ·
NEW! This native to the Himalayas to Southeast Asia is a relative of Basil and Coleus. It is famed for both its ornamental and edible uses, widely used in annual landscapes and containers as well as in its valids. Broadly ovate, serrated, aromatic foliage grows from upright dark purple stems and has a red-purple cast as well. Grows 12-36” tall with a spread to 10”. Two-tipped white flowers bloom Aug.-Oct. (Ociss)

Garlic Chives (Allium tuberosum)  
Zones 3 – 9  ·
Mildly pungent, culinary herb with 10-18” long, cylindrical, slender, hollow green leaves. Flavor and aroma is less pungent than onions. Umbels of pale, purple-pink, bell flowers bloom in summer. (Ociss)

Garlic Chives (Allium tuberosum)  
Zones 3 – 9  ·
Plat leafed variety from Japan with a mild flavor and aroma of garlic. Shows white flowers. (Ociss)
Hidcote Lavender

2' gray, scented bushes with lavender flowers blooming in late spring and summer. (Lavandula angustifolia)

Zones 5 – 9 •

This red-leaf fennel provides an eye-catching dash of color and texture to any border. 20-24” frilly foliage all season. 4’ seed heads in late summer. (Foeniculum vulgare ‘Rubrum’)

Zones 5 – 9 •

Common Lavender (Lavandula angustifolia ‘Munstead’)

Zones 5 – 9 •

Heavily fragrant and classically English! 12-15” dark lavender-blue flower spikes bloom late spring to midsummer on compact plants with small, gray-green needle-like leaves. (Lavandula angustifolia ‘Mini Blue’)

Zones 5 – 9 •

Familiar, heady fragrance in high summer. 12-15” true blue flower spikes rise above attractive, compact, gray-green leaves. (Lavandula angustifolia)

Zones 5 – 9 •

A compact selection that blooms first year! Very floriferous with spikes of vibrant, deep lavender flowers. Grows to 16” tall. (Lavandula angustifolia ‘Mini Blue’)

Zones 5 – 9 •

Garden Lovage (Levisticum officinale)

Zones 4 – 8 •

Very similar to Angelica, growing up to 2-3’. Its dark green leaves have a celery-like flavor and are used as a culinary herb. The oil from the leaves has been used to treat edema, skin problems and more. (Lipica)

Marjoram (Origanum)

Gold Marjoram (Origanum onites ‘Aureum’)

Zones 5 – 9 •

Lovely golden mats of crinkled leaves. Shiny garden plant. (Oroincum)

Sweet Marjoram (Origanum majorana)

Zones 5 – 9 •

This tender culinary herb is a superb choice for the herb garden and sauce pot! It is easily cultivated in summer and grows 12-15”. (Oroincum)

Lemon Grass (Cymbopogon citrates)

Zones 8 – 11 •

An evergreen, tender perennial with narrow, green, blade-like leaves that have a very intense, lemon scent and flavor. The herb can be used as a cooking seasoning anywhere a lemon taste is desirable. Grows 4-5’ tall. (Lipica)

Lemon Balm (Melissa officinalis)

Zones 5 – 9 •

Heavily scented lemon foliage, growing to approximately 24” tall. Most commonly used for tea and summer drinks. (Melissa)
Herbs

**Mint Mentha**

**Mojo Cocktail Spearmint** *(Mentha x piperita ‘Mojo Cocktail Mint’)*
- Zones 3 – 10
- This Proven® Select variety adds fragrance, texture and fullness to combination planters, walkway edges and beds. As the name implies, it can also be used to add flavor to your favorite mint cocktail! Plants have mint green, scalloped foliage and grow 18-24" tall and wide. (nativ)

**Peppermint** *(Mentha piperita)*
- Zones 3 – 10
- This 24" spreading perennial is used in teas, salads and extracting oil of mint. Strongly scented, a must to plant in the herb garden, mix into tubs, scented, a must to plant in the garden! Mix into tubs, potted or window boxes. (nativ)

**Spearmint** *(Mentha x piperita)*
- Zones 3 – 10
- Delightfully aromatic, spear-shaped, bright green foliage in both decorative and useful as a culinary herb. Plant near paths, decks or porches where fragrance can be appreciated. Grows 24" tall. Commonly used to flavor jellies and juleps. (nativ)

**Nasturtium** *Tropaeolum*

**Scarlet Nasturtium** *(Tropaeolum majus ‘Alaska’)*
- Zones 9 – 11
- Attractive, green and cream variegated foliage with single, orange, red and yellow flowers blooming July until frost. Grows 12" tall. Flowers are edible and can be used in salads or as a garnish for your favorite dish. (nativ)

**Yellow Nasturtium** *(Tropaeolum majus ‘Mighty’)*
- Zones 9 – 11
- Eye-popping, bright cream-colored flowers with dark orange inner spots create a stunning contrast with the dark green foliage. Compact, non-trailing, mound- ing habit. Grows to 10" tall. Flowers are edible. (nativ)

**Oregano** *Origanum*

**Common Culinary Oregano** *(Origanum vulgare)*
- Zones 5 – 9
- A fine, classical, culinary herb with nicely textured, strongly scented, flavored leaves. Ideal for the herb garden, border front, decorative container or rockery. Grows 18-24" with attractive summer flowers. (nativ)

**Compact Oregano** *(Origanum vulgare ‘Dark Leaf’)*
- Zones 5 – 9
- A Proven® Select. Grows 6-10" tall. Great in beds, landscapes and containers, along walkways and on patios. (nativ)

**Greek Oregano** *(Origanum vulgare ‘Dark Leaf’)*
- Zones 5 – 9
- Greek oregano has a stronger flavor than *O. vulgare*. It has colorful, dark red foliage in spring and fall, otherwise grayish green. White flowers in summer. Grows 18" in height and spread. (nativ)

**Ornamental Oregano** *(Origanum vulgare ‘Empress of India’)*
- Zones 5 – 9
- Bright green, flat-topped form with a pronounced flavor. A gourmet’s delight. Very common in American, European and Middle Eastern cooking. Biennial. (nativ)

**Variegated Mixed Colors Nasturtium** *(Tropaeolum majus ‘Alaska’)*
- Zones 9 – 11
- Attractive, green and cream variegated foliage with single, orange, red and yellow flowers blooming July until frost. Grows 12" tall. Flowers are edible and can be used in salads or as a garnish for your favorite dish. (nativ)

**Greek Oregano** *(Origanum vulgare ‘Dark Leaf’)*
- Zones 5 – 9
- Greek oregano has a stronger flavor than *O. vulgare*. It has colorful, dark red foliage in spring and fall, otherwise grayish green. White flowers in summer. Grows 18" in height and spread. (nativ)

**Ornamental Oregano** *(Origanum vulgare ‘Empress of India’)*
- Zones 5 – 9
- Bright green, flat-topped form with a pronounced flavor. A gourmet’s delight. Very common in American, European and Middle Eastern cooking. Biennial. (nativ)

**Common Culinary Rosemary** *(Rosmarinus officinalis)*
- Zones 7 – 10
- Aromatic herb. This outstanding cultivar is recognized for its improved hardiness. (nativ)

**Cascade Rosemary** *(Rosmarinus officinalis ‘Hill Hardy’)*
- Zones 8 – 10
- An ever popular culinary and aromatic herb. This outstanding cultivar is recognized for its improved hardiness. (nativ)

**Trailing Blue Rosemary** *(Rosmarinus officinalis ‘Tender Blue’)*
- Zones 8 – 10
- A recent introduction, bearing attributes similar to the species with stronger, deeper blue flowers in summer. Tender herb to zone 8. (nativ)

**Rue Ruta**

**Common Rue** *(Ruta graveolens ‘Dark Beauty’)*
- Zones 5 – 9
- Decorative and aromatic herb. Prized for its lacy blue foliage and yellow flowers. (nativ)

**Italian Parsley** *(Petroselinum crispum)*
- Zones 6 – 10
- This culinary herb provides flavorful leaves for salads and garnishes for soups and sauces. (nativ)

**Italian Parsley** *(Petroselinum crispum ‘Variegated Mixed Colors’)*
- Zones 6 – 10
- Dark blue-green foliage. Has colorful, dark red foliage in spring and fall, otherwise grayish green. White flowers in summer. Grows 18" in height and spread. (nativ)

**Patchouli** *(Pogostemon cablin)*
- Zones 9 – 11
- A perennial herb grown mainly for its foliage, with secondary white flowers blossoming fall to winter. Its oil has been used in the treatment of skin conditions and its vapors are noted for their uplifting effect when inhaled. (nativ)

**Rosemary** *

**Rosemary** *(Rosmarinus officinalis ‘Barbeque’)*
- Zones 8 – 10
- Finely cut, curly, dark green leaves stay fresh looking throughout the season. This commonly used herb adds a savory taste and pungent aroma to soups and stews. (nativ)

**Rosemary** *(Rosmarinus officinalis ‘Common’)*
- Zones 8 – 10
- A fine, classical, culinary herb with nicely textured, strongly scented, flavored leaves. Ideal for the herb garden, border front, decorative container or rockery. Grows 18-24" with attractive summer flowers. (nativ)

**Common Culinary Rosemary** *(Rosmarinus officinalis ‘Dark Leaf’)*
- Zones 7 – 10
- Aromatic herb. This outstanding cultivar is recognized for its improved hardiness. (nativ)

**Rosemary** *(Rosmarinus officinalis ‘Compact’)*
- Zones 7 – 10
- A recent introduction, bearing attributes similar to the species with stronger, deeper blue flowers in summer. Tender herb to zone 8. (nativ)

**Rue** *(Ruta graveolens ‘Dark Beauty’)*
- Zones 5 – 9
- Decorative and aromatic herb. Prized for its lacy blue foliage and yellow flowers. (nativ)
**SAGE**

**Common Culinary Sage** (Salvia officinalis)

- Zones: 5-10
- Full Sun
- Deer resistant

Beautifully scented leaves, commonly used for flavoring. Grows to 3' tall.

**Golden Pineapple Sage** (Salvia elegans 'Golden Delicious')

- Zones: 7-10
- Full Sun
- Deer resistant

Bright golden leaves with pineapple-like scent. Grows to 5' tall.

**Mountain Garden Sage** (Salvia officinalis 'Berggarten')

- Zones: 5-7
- Full Sun
- Deer resistant

Compact, aromatic leaves. Grows to 12" tall.

**Purple Sage** (Salvia elegans 'Rutinans')

- Zones: 5-10
- Partial Sun/Shade
- Deer resistant

Deep purple foliage with violet flowers. Grows to 10" tall.

**Pineapple Sage** (Salvia elegans 'Tri-color')

- Zones: 5-10
- Full Sun
- Deer resistant

Variegated green, purple, and white foliage. Grows to 12" tall.

**Summer Savory**

*Satureja montana*

- Zones: 6-10
- Full Sun
- Deer resistant

Highly fragrant leaves. Grows to 12" tall.

**Winter Savory**

*Salvia fruticosa*

- Zones: 6-8
- Full Sun
- Deer resistant

Effective in drying. Grows to 18" tall.

**Variegated Rose-Scented Geranium**

*Pelargonium 'Pink Capitatum'*

- Zones: 9-11
- Full Sun
- Deer resistant

Brightly variegated foliage. Grows to 18" tall.

**Scented Geraniums**

**PELARGONIUM**

**Citronella/Mosquito Geranium** (*Pelargonium citrwmus 'Citronella'*)

- Zones: 9-11
- Full shade
- Deer resistant

The medium green leaves give off a strong scent of citronella when bruised or rubbed. Can be rubbed on exposed skin to repel mosquitoes. Leaves are also used to flavor vinegar, punches, and more. Small, pink-lilac bicolor flowers. Grows 8-12". (PP#)

**Oak-leaf Geranium** (*Pelargonium quercifolium*)

- Zones: 9-11
- Full shade
- Deer resistant

Originating in South Africa, this species has a nice balsam-almond scent and ruffled, silvery foliage with purple black, center markings. Umbels of porpy pink flowers with dark pink markings bloom in May. In its native habitat it can grow up to 3' tall. In our region, it grows 18-24" tall. (PP#)

**Rose-Scented Geranium** (*Pelargonium Attar of Roses*)

- Zones: 9-11
- Full Sun
- Deer resistant

This scented, trailing geranium has both ornamental and culinary uses. The term attar makes reference to the fragrance of the flowers. These pelargoniums are commonly used as a source for rose-scented oil for perfumes. Umbels of pale mauve-pink flowers bloom late spring through summer. Grows to 18-24" tall and is an excellent container plant as well as summer garden plant. (PP#)

**Sweet Woodruff**

*Galium odoratum*

- Zones: 4-7
- Full Sun
- Deer resistant

Delicate, sweet vanilla-scented foliage topped by clusters of 6-12" pink, white or lavender flowers. Grows to 12" tall. (PP#)

**Tarragon/Wormwood**

**ARTEMISIA**

**French Tarragon** (*Artemisia dracunculus 'Tartaric'*)

- Zones: 5-9
- Full Sun
- Deer resistant

A popular hardy, culinary and aromatic herb, with the scent and flavor of mint-anise. Stems grow to 18" and the narrow, green leaves are used extensively to flavor dishes. (PP#)
**Caraway Thyme (Thymus herba-barona)**

**Zones 4 – 8 · £ D**

4-5" wiry prostrate stems with lavender flowers May-June. Foliage has a scent of caraway seeds. (THYCB)

**Common Culinary Thyme (Thymus vulgaris)**

**Zones 4 – 8 · £ D**

12-15" tall bushes of tiny, aromatic, oval leaves with small, tubular, pale purple blooms May-July. (THYV)

**Lavender Scented Thyme (Thymus thracicus)**

**Zones 6 – 10 · £ D**

Lovely dark green foliage emits a sweet and spicy mixture of lavender and thyme scent. Low-growing, to 3” tall, it makes a great ground cover for smaller areas and also works well in container planting. (THYTH)

**Lemon Thyme (Thymus x citriodorus)**

**Zones 4 – 9 · £ D**

A southern european native known for its versatility and easy care nature. Attractive, arching, pale green, lemon-scented foliage with long lasting pink flowers blooming in summer. Grows to 4-5" tall and looks great in containers, herb gardens, rock gardens and borders. Drought tolerant. Evergreen. (THYLC)

**Silver Posie Thyme (Thymus vulgaris ‘Silver Posie’)**

**Zones 4 – 8 · £ D**

Upright, brightly variegated, white-edged, tiny leaves against pink stems, with lavender-pink flowers. Grows up to 8” tall. (THYSP)

**Spicy Orange Thyme (Thymus x ‘Orange Spice’)**

**Zones 4 – 8 · £ D**

A combination of orange and spice scent. Remarkably strong, clear orange flavor, without a harsh after taste like other thymes. Aromatic foliage forms dense, ground-hugging mats. Many uses in cooking and in tea. (THYOS)

**‘Archer’s Gold’ Lemon Thyme (Thymus x citriodorus ‘Archer’s Gold’)**

**Zones 4 – 8 · £ D**

Low-growing, brilliant, deep golden yellow foliage in spring and fall. Lemon scented. Grows up to 12” tall. (THYAG)

**Creeping Lemon Thyme (Thymus x citriodorus ssp. citriodorus)**

**Zones 4 – 8 · £ D**

Brightly variegated mats send up 3-4” stems of lavender flowers May-June. Makes a great aromatic lawn substitute for full sun. (THYCI)

**Gold Edge Lemon Thyme (Thyme citriodorus ‘Aureus’)**

**Zones 4 – 8 · £ D**

Lemon scented, gold and green leaf variegation. Lavender flowers in late spring. Grows 10-12” tall. (THYAU)
**Artichoke**

- **Artichoke ‘Green Globe’**
  - D
  - Z 8 – 10

  This attractive, ornamental has been in cultivation since the 1500’s and has edible flower buds that remain a popular delicacy. An important visual component in an edible garden, it has prominent (6") flowers blooming from the buds remaining after harvest. Space plants 2’ apart. Best grown in large containers. Can be kept in a sunny windowsill above 23F (-5C) over winter. Return outside in early spring after danger of heavy frost. (D) (ARTVG)

- **Artichoke ‘Imperial Star’**
  - Z 8 – 10

  Large and flavorful from inception with almost 3 times the yield of older varieties! Green chokes emerge from 3-4” tall sturdy stems, sometimes tinted purple. In addition, the mild tasting buds stay closed longer than most for added harvest time. Thrives. (Z) (ARTVI)

- **Artichoke ‘Violet’**
  - Z 8 – 10

  Place this edible vegetable in your garden for its ornamental value than harvest when the buds begin to swell and plump up. Small artichokes are more tender and can be eaten whole as with stir-fry or can be left on the stem to increase in size and eat as one would a store-bought artichoke. With frost not thought of if left too long the bud will open to a flower - pretty but not necessarily edible. Grows to 6’ tall and 2’ wide. (Z) (ARTVI)

**Eggplant**

- **Eggplant ‘Bambino’**
  - D
  - Z 7 – 11

  Compact, high yield plants, just 12” tall, produce clusters of 2-5” petite, dark purple fruit. Pink flowers. Their size makes them great for hot areas, shish-kabob and more! Perfect in containers. (D) (PEPB)

- **Eggplant ‘Ghost Buster’**
  - D
  - Z 7 – 11

  Pure white goodness with tender skin and tasty fruit. The smaller size plant makes this perfect for growing in containers on patios or in the ground. For best flavor, pick when the fruit is 3-4” long, although it can grow to 7” in length without affecting flavor. Harvest before they turn yellow. Grows to 30” tall. Space 24-30” apart. (D) (PEPB)

- **Eggplant ‘Patio Baby’**
  - D
  - Z 7 – 11

  An All-American favorite winner! Exactly like the more familiar large, classically shaped, deep-purple eggplant except it is the size of a chicken’s egg. The thornless, compact plant grows to 12” tall making it perfect for containers or gardens. Super productive, yielding lots of baby eggplants all summer. Pick them at just 2-3” long. Great flavor, not bitter. Perfect roasted, grilled, in a stir-fry or shish-kabobs. (D) (PEPB)

- **Eggplant ‘Turkish Orange’**
  - D
  - Z 7 – 11

  While on a trip to Turkey, Pierre enjoyed this hot boom found in many ways and wanted to add it to our veggie line. Very flavorful, sweet not bitter, no need to salt. Prepare using your favorite eggplant recipe: stuffed, baked, roasted, shredded or diced they’re delicious. Can be eaten green, light orange to dark orange. Harvest when approx. 3” or so. (D) (PEPB)

- **Eggplant ‘Patio Sweet’**
  - D
  - Z 7 – 11

  A beautiful, round, small, red-colored, sweet eggplant. Grows to 10” tall and 8” wide. Excellent for grilling, stir-frying, baking or baking as a ratatouille. (D) (PEPB)

- **Eggplant ‘Turkish Red’**
  - D
  - Z 7 – 11

  Produces reddish-purple eggplant fruits that are sweet, mild and tasty. Grows to 18” tall and 14” wide. Excellent for grilling. (D) (PEPB)

- **Eggplant ‘Turkish Black’**
  - D
  - Z 7 – 11

  Grows to 18” tall. Propagation is prohibited. (D) (PEPB)

**Fennel**

- **Fennel**
  - £
  - Z 8 – 10

  Foeniculum vulgare

  Large, thick, licorice flavored bulbs. An Italian vegetable, highly prized for its versatility. They can be eaten raw, used in salad and veggie platters and can also be grilled. The feathery foliage is a choice herb used in many dishes. Swallowtail butterflies love it too! Easily incorporated into a flower border as well as a vegetable garden. (Z) (FENEL)

**Kale**

- **Kale ‘Nero di Toscano’ (Lacinato)**
  - £
  - Z 8 – 10

  Also known as Dinosaur or Tuscan Kale, this popular Italian heirloom has earthy flavor. Quite cold tolerant and is able to take a frost. Regrows vigorously when cut. (Z) (KALE)

- **Kale ‘Redbor’**
  - £
  - Z 8 – 10

  Deep dark blue-green leaves are highly attractive, ornamental has been in culivation since the 1500’s and is quite cold tolerant. While on a trip to Turkey, Pierre enjoyed this hot boom found in many ways and wanted to add it to our veggie line. Very flavorful, sweet not bitter, no need to salt. Prepare using your favorite eggplant recipe: stuffed, baked, roasted, shredded or diced they’re delicious. Can be eaten green, light orange to dark orange. Harvest when approx. 3” or so. (D) (PEPB)

**Onion**

- **Onion ‘Red Marble’**
  - £
  - Z 6 – 9

  This onion has a beautiful deep dark red color and is smaller, sweeter and more squat than a normal onion. Delicious fresh out of the garden, perfect for roasting or shish-kabobs. (Z) (ONIR)

**Pepper**

- **Pepper ‘Bhut Jolokia’**
  - H
  - Z 8 – 10

  One of the world’s hottest peppers! This edible hot pepper was originally developed in India for pepper spray. 3” long fruit grows on low maintenance plants that are very strong, requiring no staking. Plants grow to 40” tall and 30” wide. Not only ornamental but also very prolific, yielding lots of peppers from just one plant. Tastes red when mature. Grows to 40” tall. 800,000-1,041,000 Scoville Units. (Z) (PEPA)

- **Pepper ‘Black Pearl’**
  - H
  - Z 8 – 10

  Prow Venon Strikers, dark purple black/dark green foliage with bright purple peppers that give way to unique, black pearl-like peppers. Peppers start out black mature to bright red. Grows 18” tall. Propagation is prohibited. (Z) (PEPA)

- **Pepper ‘Bulgarian Carrot’**
  - H
  - Z 8 – 10

  A bright orange pepper that is shaped like a carrot. The Bulgarian carrot has a great crunchy flavor that is medium to hot in spiciness. Fruits grow in abundance in nice clusters on short plants. Ornamental and edible, it’s great on the patio and in the kitchen! Lends itself to salads and sauces. Fresh or cooked, it’s a winner. Grows 18-24” tall. 2,000-5,000 Scoville Units. (Z) (PEPA)

- **Pepper ‘Matthew’s Mix’**
  - H
  - Z 8 – 10

  Our own Matthew Arthur has done it again, with this outrageous mix of Trinidad 7 Pod red, yellow and orange to dark orange. Harvest when mature. Grows to 40” tall. 800,000-1,041,000 Scoville Units. (Z) (PEPA)

- **Pepper ‘Orange Bell’**
  - H
  - Z 8 – 10

  An orange, medium sized, sweet bell pepper. The easy to grow, prolific, compact plants are known for their outstanding flavor and disease resistance. Check full of vitamins and nutrients. Extra sweet when fully ripened. Grows 24-30” tall. (Z) (PEPA)

- **Pepper ‘Round of Hungary’**
  - H
  - Z 8 – 10

  A very unique and tasty pimento cheese type with thick, ribbed bright red flesh. Perfect for stuffing or to complement salads. (Z) (PEPA)

- **Pepper ‘Sangria’**
  - H
  - Z 8 – 10

  We had fun growing this and thought you would too. The peppers point skywards changing from dark purple to bright red as they ripen and since they never get hot, they can be eaten at any stage of color development. Grow to eat as or ornamental, it’s sure to be a favorite with kids and adults. Grows 10-12” tall. (Z) (PEPA)

**Rhubarb**

- **Rhubarb ‘Canada Red’**
  - £
  - Z 8 – 10

  This variety of Rhubarb is known for its sweetness and bright cherry-red coloration that stands out even when cooked. They are very tender, requiring little to no peeling. Plants grow to 32” tall and wide. Harvest in late summer for pies or freeze for later use. (Z) (RHUB)

**Shallot**

- **Shallot ‘Prisma’**
  - £
  - Z 8 – 10

  You can’t “Master the Art of French Cooking” without Shallots. A subtle taste all its own; not as sharp as an onion nor as pungent as garlic. Grow in rich loam soil. Harvest in the fall. For larger bulbs, cut off any flower tops. This variety has the colored red skin and distinct mild flavor Shallots are known for. Grows 1.5-3” tall. Space 3-4” apart. (Z) (SHAL)

**Tomato**

- **Tomato ‘Gardeners Delight’**
  - £
  - Z 8 – 10

  Grows to 24” tall. A sweet indeterminate that produces a lot of tomatoes. Grows in a 5 gallon pot. (Z) (TOMA)

- **Tomato ‘Hybrid’**
  - £
  - Z 8 – 10

  The Black beauty hybrid produces a lot of tomatoes. Grows in a 5 gallon pot. (Z) (TOMA)

- **Tomato ‘Zeda’**
  - £
  - Z 8 – 10

  Grows to 30” tall. Produces a lot of tomatoes. Grows in a 5 gallon pot. (Z) (TOMA)
Swiss Chard

Swiss Chard ‘Bright Lights’

A fun vegetable to grow, the stems come in a kaleidoscope of color: yellow, orange, red, pink, green and white with green or bronce colored leaves. Both the stems and leaves are edible. Prepare the tender leaves as you would any fresh green and the mild, crunchy midrib and stems can be prepared like asparagus. To harvest, cut at ground level. Grows to 12-24” tall. Space 15-20” apart. 1998 All American Selection winner.

Swiss Chard ‘Ruby Red’

We love chard, enjoying the young leaves in a salad mix while the bigger leaves are delicious cooked. Extremely healthy, Swiss chard has many antioxidants, vitamins and nutrients. Very easy to grow it makes a beautiful addition to any garden.

Strawberry

Strawberry ‘Albion’

A June-bearing variety that comes on early and will yield lots of medium-large, deep red fruit that are full of that wonderful strawberry flavor. Well adapted for the Northeast, Midwest and mid-Atlantic regions. Grows 8-10” tall. (STREAS)

Strawberry ‘Evie 2’

The Vinson family has been breeding strawberries in Kent, England for over 150 years and you could say their motto is “Our strawberries don’t just look good-they taste good too”. Evie 2 is one they are especially proud of. Naturally sweet with a fabulous flavor, Evie 2 will continue to produce berries month after month instead of only in June, the traditional month when strawberries ripen. A vigorous grower- grows 8” tall, space 12” apart. (STREAS)

Strawberry ‘Pierre’s Pick’

If you want a great tasting strawberry and you don’t have a variety preference, this one’s for you. Every year, Pierre’s personal strawberry patch starts to get out of control resulting in Pierre ripping out all the extras that try to take over his garden. Vigorous, strong plants produce great tasting strawberries. You won’t be disappointed. (STREAS)

Tomato

Tomato ‘San Marzano’

A customer recommended we try our own Ugly Tomato. This large red tomato is packed with that old-fashioned, great tasting, tomato flavor that we all love. Somewhat oddly shaped with deep ridges, it has good disease resistance. An Italian heirloom. Indeterminate. (TOMUGR)

Tomato ‘Purple Bumblebee’

“Artisans” tomato that is reddish-purple with lime green stripes. Very flavorful, it looks great when mixed with other varieties or on its own. Easy to grow, it matures in 70 days and will continue producing lots of tomatoes well into late summer. Indeterminate. (TOMPM)

Tomato ‘Golden Sweet’

Tastes as good as it looks! A small pear-shaped tomato to come out of Italy and considered by many chefs be the best of its kind! A great choice for use in sauces, salsa, salads and more. (TOMPM)

Tomato ‘Juliet’

Extra early to ripen, ‘Legend’ will reach just under a pound. A bonus- Legend was bred to be resistant to late blight, which has plagued the East Coast in recent years. Indeterminate. (TOMLE)

Tomato ‘Ugly’

Found in most supermarkets... now VDII too, can grow your own ugly tomato! This large red tomato is packed with that old-fashioned, great tasting, tomato flavor that we all love. Somewhat oddly shaped with deep ridges, it has good disease resistance. An Italian heirloom. Indeterminate. (TOMUGR)

Tomato ‘San Marzano’

Our pepper aficionado Matthew also has a fondness for great tasting tomatoes. He searches high & low for the more unusual types, plants them in his garden and brings his favorites to work, where we are the happy beneficiaries. This big beefsteak has pink-red coloration, with green stripes changing to sunny gold. Expect lots of sweet, juicy tomatoes and be sure to provide support for this potato leaf beefsteak. Grows 36” or higher. Space 24” apart. Indeterminate. (TOMUGR)

Tomato continued

LARGE FRUITED

**Cherry**

Tomato ‘Sun Gold’

“Awesome, “really sweet,” “best tasting all season,” “amazing flavor” and “easy to grow” are just a few comments tossed out by our experts when asked what they thought about Sun Gold. The half-dollar size orange-yellow color contrasts nicely in salads to the red. A great way to introduce kids to growing vegetables and teaching variations from what’s commonly available at the store. Note: Plants are vigorous and should be given support either caged or tied to a trellis or stake. Space 36” apart. Indeterminate. (TOMSCH)

**Grape**

Tomato ‘Golden Sweet’

Golden Sweet is a beautiful, yellow, grape tomato that ripens early and continues to bear throughout the summer. The flavor is reminiscent of the tomatoes our grandmothers grew - sweet, delicious and tasty. Golden Sweet grows in long clusters making them easy to pick, easy to eat. Put some in your kid’s lunch and see how fast they come back for more! Indeterminate. (TOMSGR)

**Plum**

Tomato ‘Juliet’

A customer recommended we grow Juliet. An All America Selections winner, this tomato has fabulous flavor, easy to grow, and perfect for the home garden. A plum or roma type that is great eaten fresh or cooked. Make into a sauce or salsa, add it to soup or a salad. (TOMPL)

**Small Fruited**

Tomato ‘Purple Bumblebee’

Tastes as good as it looks! A small “Artisans” tomato that is reddish-purple with lime green stripes. Very flavorful, it looks great when mixed with other varieties or on its own.
